engine output *(n)* ***(marine eng)*** **snaga motora:** *For **engine outputs** of up to 8000 kW, only one turbocharger is used.*

engine performance *(n)* ***(marine eng)*** **radne karakteristike, performanse stroja, radni učin stroja:** *The controllable injection timing (CIT) pumps also ensure that **engine performance** is improved at the service load. The computer-controlled fuel injection system opens up possibilities to optimize **engine performance**, thanks to the freedom to choose key parameters: injection timing, injection pressure independent of engine speed, maximum injection quantity …*

engine power *(n)* ***(marine eng)*** **snaga motora, snaga stroja:** *Using full rudder and **engine power**, and transmitting appropriate signals on the air horn and VHF radio, the master just managed to turn the ship's head into the wind and… An **engine power range** from 20 000 kW to 28 000 kW per turbocharger is covered by the TPL-91B .* **limit engine power ograničiti snagu stroja (radi smanjivanja onečišćenja):** *… to reduce greenhouse gas emissions from international shipping, technical measures to **limit engine pow**er are among the ideas being considered to reduce carbon dioxide (CO2) from the existing fleet. Marineinsight* https://www.marineinsight.com/**, engine power limitation ograničavanje snage stroja, regain engine power povratiti (pogonsku) snagu:** *The cruise ship suffered a total power failure . It **regained engine power** at 2.14pm, according to ship tracking data, and was escorted to port.* www.The Times.uk

engine power limiter (=EPL) *(n)* ***(marine eng)*** **ograničavač snage stroja:** *The Australian Maritime Safety Authority (AMSA) has published a Marine Notice to address the risks associated with the use of **engine power limiters (EPL)** and similar power restriction systems on ships.* https://safety4sea.com

engine problems ***(navig)*** **problemi sa strojem, poteškoće sa strojem:** *the ship was having some engine problems and drifted midstream in a strong breeze* brod je imao problema sa strojem i otpadao (plutao) u jakoj struji po sredini kanala i pri jakom vjetru *On boarding, it was discovered that **the loaded vessel had engine problems** and the Master had ordered spares which would arrive the following morning. After several days at sea **a serious engine problem occurred** in number 7 cylinder.*

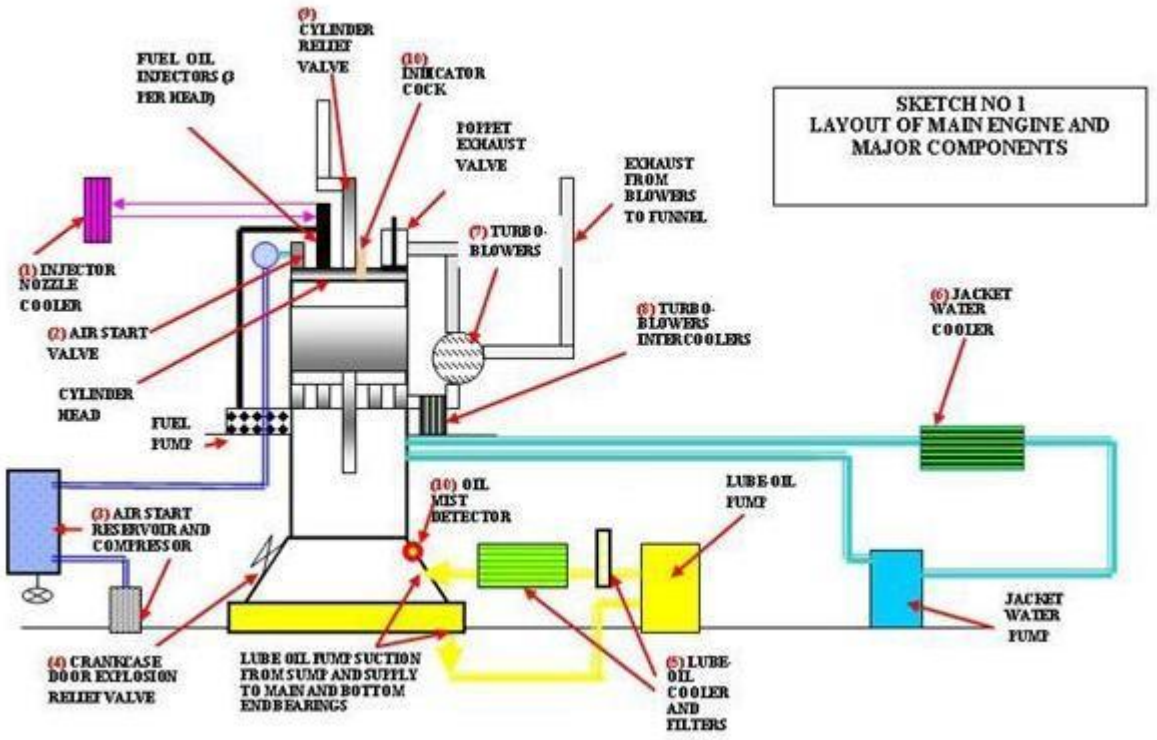
engine readiness *(n)* ***(navig)*** **spremnost stroja za pokretanje / manovru state of engine readiness stanje spremnosti stroja za manovru, stupanj spremnosti stroja za manovru**

engine ready for immediate manoeuvre *(n)* ***(navig)*** **stroj spreman za neposrednu manovru:** *Own ship quite rightly in my opinion had her **engine ready for manoeuvre**, but, does not appear to have had any intention to use it.*

engine repairs *(n)* ***(marine eng)*** **popravci na stroju:** *My technical department at the time was fully engaged in **carrying out a major engine repair** … The sea conditions were slight and the vessel continued to drift in a southeasterly direction towards the Moroccan coast while **engine repair** work continued.*

engine revolution *(n)* ***(marine eng)*** **broj okretaja stroja:** *About 10 minutes afterwards, **the main engine revolutions dropped** from 1400 rpm to about 1100 rpm.*

engine room (=engine-room; engineroom) *(n)* **1** ***(marine eng)*** **= machinery room = machinery strojarnica, brodska strojarnica:** *The duty engineer entered the **engine room** at 06:50 to man the **engine room**. The chief engineer entered the **engine room** at the upper level, without BA, to guide the fire brigade.*; **2** ***(marine eng)*** **strojarnica, Italian:*sala macchine*; *locale motore***



https://www.brighthubengineering.com/marine-engines-machinery/53537-main-engine-layout-familiarization-b-and-w-engine-room-layout/ {It.:: sala macchine}

engine room access *(n)* ***(nav arch, marine eng)*** **prilaz strojarnici:** *At 1450, the engine room alarm panel repeater sounded in his cabin, so he immediately ran the short distance to the **engine room access** where the panel was situated.*

engine room alarm *(n)* ***(marine eng, safety)*** **alarm u strojarnici:** *As the lift was being prepared, the **engine room alarm sounded**.*

engine room bilges *(n)* ***(nav arch)*** **kaljuže strojarnice:** *The duty engineer opened the overboard valve to prevent the system from potentially overflowing into the **engine room bilges**.*

engine room bulkhead *(n)* ***(nav arch)*** **pregrada strojarnice:** *Smoke was filtering through the **engine room bulkhead** and filling the wheelhouse, making it impossible to use the main VHF radio set.*

engine-room cadet *(n)* ***(marine eng)*** **vježbenik stroja, asistent stroja**

engine-room casing grotlo strojarnice: *On leaving his office, he saw flames rising from the stairwell around the **engine room casing**.*

engineroom component *(n)* ***(marine eng)*** **sastavni dio strojarnice**

engine room CO2 system *(n)* ***(marine eng, safety)*** **sustav za gašenje**

strojarnice ugljičnim dioksodom: *The master decided it would be necessary to operate the **engine room CO2 system** to extinguish the fire.*

engine room crew *(n)* **1** ***(marine eng)*** **posada stroja:** *Whilst the other engineer officers were engaged on various jobs, one of the **engine room crew** was cleaning the lube oil filters.*; **2** ***(marine eng)*** **član posade stroja:** *An **engine room crew** attempted to call the bridge, but received no response. **An exhausted engine room crew** once again opened, cleaned and boxed up the sea suctions (again filled with tiny fish) and the ship sailed from the terminal without any delay,*

engine-room department *(n)* ***(marine eng)*** **služba stroja:** *The Engine Department onboard a merchant ship is responsible for all maintenance and repairs of engines, electric motors, pumps, winches and other mechanical and electrical equipment. Job positions, on board a (US / Croatian, etc.) ship, within this department include Chief Engineer, 2nd, 3rd and 4th Engineer, Trainee Engineer, Chief Mechanic, Mechanic, Fitter, Oiler, Wiper and Engine Utility Man. Engine-Room Department - The modern ship's propulsive unit, whether steam turbine or diesel engine, is run on oil, and the **engine-room department** is composed of a team of engineer officers and ratings controlled by the chief engineer, who ranks after the master. The modern ship's propulsive unit, whether steam turbine or diesel engine, is run on oil, and the **engine-room department** is composed of a team of engineer officers and ratings controlled by the chief engineer, who ranks after the master.*

engine room door *(n)* ***(nav arch, marine eng)*** **vrata strojarnice:** *He shut the **engine room door**, informed the master of the fire and recommended that both main engines be shut down. It was initially assumed that the smoke was coming from the open **engine room door**. **He shut the engine room door**, informed the master of the fire and recommended that both main engines be shut down.*

engine room double bottom tank **dvodno u strojarnici**

engine room escape hatch *(n)* ***(nav arch, safety)*** **grotlo strojarnice za izlaz u nuždi:** *The **engine room escape hatch** was locked from the outside. Assuming this was an **Engine Room escape hatch** then it would be best secured from the inside, thus allowing those attempting to get out to achieve their escape.*

engine room fan *(n)* **ventilator u strojarnici:** *Conscious of the need to isolate the oxygen supply, and potential fuel supply to the fire, he blocked the engine room ventilators, and shut down the **engine room fans**, main engine and generator.*

engineroom fire *(n)* ***(safety, marine eng)*** **požar u strojarnici:** *The fuel is supplied to the injectors through drillings in the cylinder head, dispensing with high-pressure fuel lines and removing a potential cause of **engineroom fire**. By now the crew, who had regularly exercised fighting an **engine room fire**, had blocked off the engine room vents, carried out boundary cooling on the deck using the hand-operated deckwash pump, and … A containership **suffered an engine room fire** that left the ship adrift in the Caribbean Sea.* https://gCaptain.com

engine room hatch *(n)* ***(nav arch, marine eng)*** **grotlo strojarnice:** *Back in the wheelhouse, the skipper closed the **engine room hatch** and instructed the crew to haul in the fishing gear and don their lifejackets. **The engine room hatch was opened**, and a hose was discharged into the engine room. The **engine room hatch** was opened, and a hose was discharged into the engine room.*

engine room log book (=engine-room log) *(n)* ***(marine eng)*** **dnevnik stroja:** *Marine engineers are required to **keep a log** of all important machinery parameters such as pressure,temperatures, revolutions etc. in the **engine room log book**. A sea protest must by copies of the deck log book and of the **engine-room log**.*

engine-room personnel *(n)* ***(marine eng)*** **osoblje strojarnice, posada strojarnice, svi zaposleni u strojarnici:** ***Engine-room personnel** is fully ready to manoeuvre and bridge manned to relay engine orders.*

engine-room rating *(n)* ***(marine eng)*** **mornar stroja, član nižeg osoblja stroja**

engineroom space *(n)* **prostor strojarnice:** *If **engineroom space** allows, the complete cylinder unit (cylinder head, water collar, liner, piston and connecting rod) can be withdrawn as a single assembly.*

engineroom staff *(n)* ***(marine eng)*** **osoblje strojarnice, personal stroja:** *Two of the **engine room staff** remained in the engine room and two went to the vehicle deck. The second engineer distributed the day's work to the **engine room staff**, verbally instructing the junior wiper to burn the garbage in the incinerator.*

engineroom telegraph *(n)* ***(marine eng)*** veza između zapovjedničkog mosta i strojarnice za upravljanje strojem; A mechanical signaling device for communicating propulsion orders and acknowledgements between the bridge and the engine room. (http://www.seatalk.info/cgi-bin/nautical-marine-sailing-dictionary) **strojarski telegraf, telegraf za stroj:** *Other equipment is to be tested and made ready for going to sea: the **engine-room telegraph**, the speed log, the ship's whistle, the steering gear and the winches, for instance.*

engine room vent *(n)* ***(nav arch, marine eng)*** **zračnik u strojarnici, ventilacijski otvor u stiojarnici:** *…, the tug master and chief engineer went back on board and "cracked" open the **engine room vents** before returning to the rescue vessel.*

engine-room watch *(n)* ***(marine eng)*** **straža u stroju:** *s tankers and bulk carriers employ dual-watch (poli-valent) officers (MarOff in the Natherlands) capable of keeping simultaneously the navigating and **engine-room watch**.*

engine room workshop *(n)* ***(marine eng)*** **strojarska radionica:** *Making the ramp door operable A new set of wedges and small doublers was quickly fabricated in the **engine room workshop** and immobilisation and hot work permits were obtained at the next berth the following day.*

engine skylight *(n)* ***(nav arch)*** **vidnik strojarnice:** *I sent my watchman to close the **engine room skylight** and inform the crew of the rain.*

engine spares *(n)* ***(sailing/boating/yachting, marine eng)*** **pričuvni dijelovi motora** **spark plugs** **svjećice (benzinski motor),** **injector** **ubrizgač (dizelski motor),** **repair kit for fuel and water pumps with seals and impellers** **komplet za popravak pumpe goriva i pumpe rashladne vode s brtvama i impelerima,** **set of hoses** **komplet gumenih cijevi,** **oil filters** **fltri ulja,** **fuel filters** **filtri goriva,** **set of gaskets, seals, and O-rings** **komplet brtava i brtvenih prstena,** **fuel** **gorivo,** **oil and grease** **ulje i mast za podmazivanje,** **fuel antibacterial additives** **antibakterijski aditivi za gorivo,** **spare ignition key** **rezervni ključ za paljenje motora**

engine speed (=r/mn) *(n)* ***(marine eng)*** **broj okretaja / obrtaja motora, brzina stroja:** ***Engine speed** is controlled by a mechanical or electronic governor with hydraulic actuator. The 'heart' of the system was a microprocessor to which the actual **engine speed** and crankshaft position were transmitted as output signals. Full load can be accepted swiftly and smoothly **at any engine speed**, says EMD, and a 10 per cent overload capability can be exploited for two out of every 24 h of running. A **reduction in engine speed** compared with the BL550 limited the mean piston speed and yielded the increased output with virtually the same brake mean effective pressure. Although a late order to **increase engine speed** and helm was given, the vessel made contact with the buoy.*

engine stores *(n)* **1** ***(nav arch)*** **spremište strojarnice;** **2** ***(marine eng)*** **zalihe i materijali za strojarnicu**

engine switch *(n)* ***(marine eng, sailing/boating/yachting)*** **prekidač motora (za dovod**

i zatvaranje goriva na izvanbrodskom motoru)

engine telegraph ***(marine eng)*** **strojarski telegraf:** *At 2340, the master moved the* ***engine telegraph*** *from 'dead slow ahead' to 'slow ahead'; the tanker's speed was about 2kts and it remained on an easterly heading. A load programme led to a delay between the setting of the* ***engine telegraph*** *and the engine achieving the speed intended. The Master was quickly on the bridge and moved the* ***engine telegraph*** *to stop. If the* ***engine telegraph printer*** *for some reason does not function, movements shall be recorded manually, in this case in the Bridge and Engine Bell Books. The ship's* ***engine telegraph*** *was set to full ahead.*

engine top *(n)* ***(marine eng)*** **vrh stroja:** – *The exhaust valve and fuel injection – Integration of the top-controlled booster injection valve (FBIV) on the cylinder cover* www.man-es.com

FCC (=first class charterer) ***(shipping econ)*** **prvoklasni čarterer**

F.C.L. (=full container load) *(n)* ***(mar law, shipping econ)*** **ANTONYM LCL COMPARE container load** Full Container Load – means that the container has cargo that is shipped by one shipper for delivery to one consignee.. FCL is one of the Container Service Types in shipping.. (https://www.shippingandfreightresource.com/); In a FCL shipment the shipper usually packs its goods in the container and seals it.; sav teret u kontejneru glasi na istoga primatelja; Quantity of cargo, which fills a shipping container to capacity, either by weight or cubic measurement.; an ocean shipment in which the cargo occupies a full container (of any size) (https://www.flexport.com/glossary/full-container-load/) **izravna kontejnerska pošiljka, direktna kontejnerska pošiljka:** *FCL is cheaper than LCL LCL costs more than **FCL** per unit of freight. That's because freight agents prefer a **full container load** rather than to figure out how to bundle many LCL shipments in a full container. **FCL** gets delivered more quickly than LCL*

FCL allowance *(n)* ***(mar law, shipping econ)*** Deduction from the FCL freight provided by a shipping line or liner conference to a shipper who loads a minimum number of tons or cubic meters of cargo into a shipping container. There may be various allowances depending on the degree of utilization of the container. Also known as utilization allowance. **popust na vozarini za puni kontejner / FCL (popust najvećem krcatelju za teret u jednom kontejneru)**

FCL/FCL *(n)* ***(shipping econ)*** Term used to describe a container freight rate whereby the shipper is responsible for packing of the container and the shipper or receiver, as the case may be, is responsible for the unpacking. **FCL/FCL, vozarina za puni kontejner u kojoj je krcatelj odgovoran za pakovanje, a primatelj tereta za raspakiranje kontejnera**

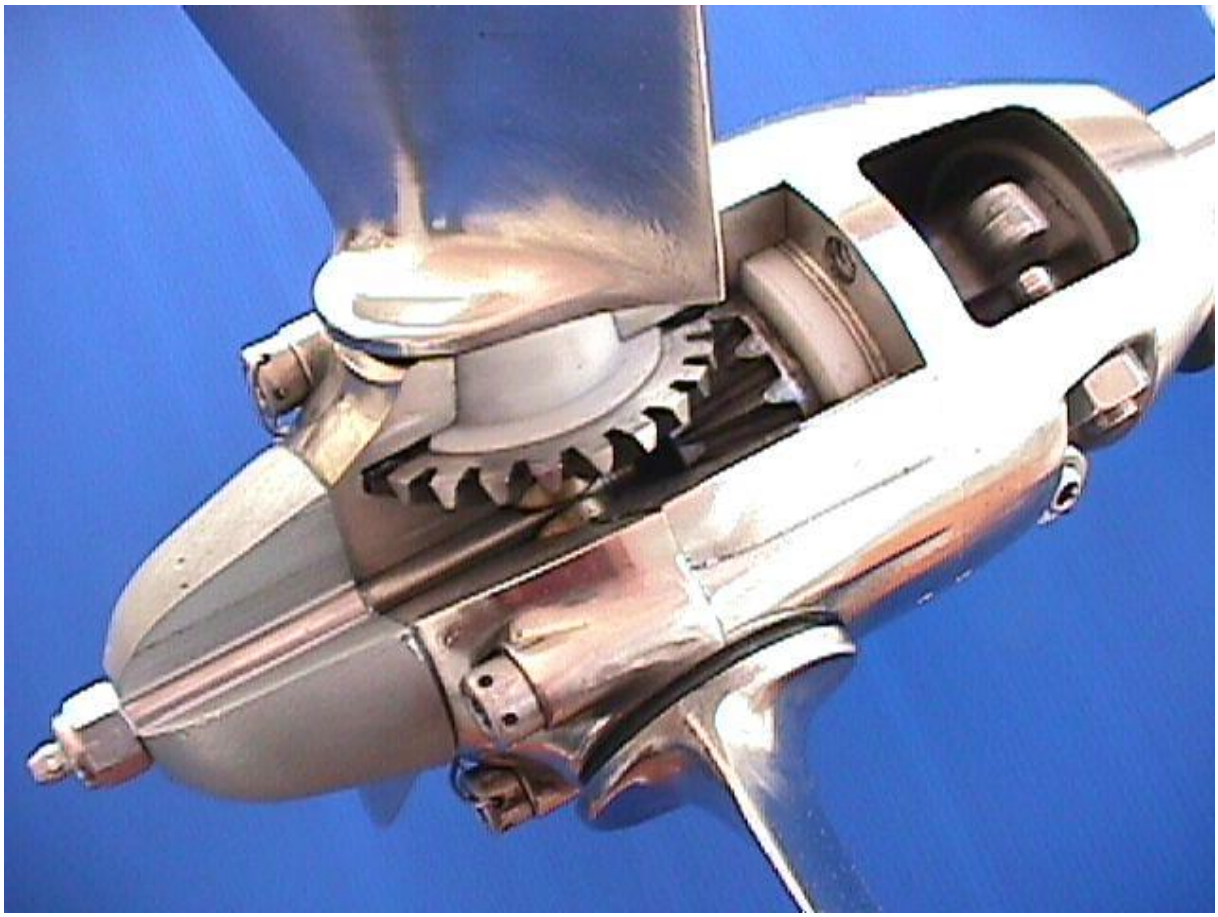
fear *(v)* **fear damage to cargo bojati se / strahovati da je teret oštećen strahovati, bojati se**

feathering *(n)* ***(sailing/boating/yachting)*** Sailing a fine directional line between two points of sail, usually close hauled and irons *http://www.apsltd.com/aps-advisor/sailing-terms-glossary/* **jedrenje preoštro uz vjetar (jedra lepršaju)**

feathering mechanism *(n)* ***(sailing/boating/yachting)*** **mehanizam elastičnog propelera**

feathering propeller */ˈfeðəriŋ/* *(n)* ***(sailing/boating/yachting)*** **COMPARE folding propeller COMPARE fixed propeller** Feathering props are one of the best propellers for sailing boats when mixing performance under sail and power. they get their name due to the feathering blades, which align with water flow when in neutral. (http://myboatsgear.com/2016/12/27/sailboat-propellers/); an automatically self-pitching feathering propeller which varies its pitch depending on the operating conditions, thus maintaining maximum efficiency at all times. ... The blades automatically adjust their pitch to match the engine torque to the varying load conditions. (https://kingpropulsion.com/autoprop/); A propeller whose blades have been rotated so that the leading and trailing edges are nearly parallel with the aircraft flight path to stop or

minimize drag and engine rotation.; Feathering props have blades that rotate 180 degrees so the leading edge is still the leading edge in reverse, which makes them more efficient in reverse over folding and fixed propellers. (http://myboatsgear.com/) **sklopivi prekretni propeler (s krilima u liniji kretanja jedrilice), sklopivi propeler s promjenjivim korakom lopatica:** *The **Max-Prop feathering propeller** had excellent stopping power, but needed rebuilding three times in 18 years. The **Flexofold** was sized to match the new smaller 75-horsepower engine.*
https://www.practical-sailor.com/issues/44_2/features/Folding-vs-Feathering-Props_12354-1.html?ET=practicalsailor:e36748:2438214a:&st=email&s=p_Grabbag012118 *The advantages of the **Max-Prop** are very little drag when sailing as the prop instantly **feathers** unless the engine is engaged, no freewheeling in neutral, adjustable pitch, and incredible stopping power in reverse. Max-Prop can literally bring a boat from 6 knots to a dead stop in a boat length*
https://www.practical-sailor.com/issues/44_2/features/Folding-vs-Feathering-Props_12354-1.html?ET=practicalsailor:e36748:2438214a:&st=email&s=p_Grabbag012118 *My installation required that the prop shaft be trimmed about 1/2 inch meaning that it could never again be used with a fixed prop; a critical concern to determine for your boat before undertaking...it is a marriage and divorce is always expensive. Consider this factor on any **feathering/folding prop** selection.*
https://www.practical-sailor.com/issues/44_2/features/Folding-vs-Feathering-Props_12354-1.html?ET=practicalsailor:e36748:2438214a:&st=email&s=p_Grabbag012118# *As the blades rotate 180 degrees in ¾ turn of the shaft a **feathering propeller** has the same efficiency in reverse as in forward. ... … a **feathering propeller** is a low drag propeller. When motoring, the blades swing to the ahead or astern angled position, but under sail they **'feather'**, turning parallel to the boss. **Feathering propellers** typically produce nearly as much forward thrust as folding propellers and more forward thrust than those that are fixed. **They** are also generally more efficient than folding propellers when going astern.*
https://www.sailmagazine.com/diy/why-low-drag-propellers ***Feathering props** create about 5-10% of a fixed prop's drag, sometimes less, while folding props have almost zero drag.*
https://www.sailmagazine.com/diy/why-low-drag-propellers



https://www.yachtingmonthly.com/gear/folding-and-feathering-propeller-test-29807 {Feathering is only possible with variable pitch propellers and means that the blades are turned such that their mid-to-outer section is aligned with airflow and they create minimal air (or water) resistance. GNSS receiver *(n)* ***(navig)*** GNSS Receivers are the core product for satellite positioning. They convert signals from visible satellites into a position on earth. The amount of visible satellites is dependent on the number of constellations the receiver is compatible with, such as GPS, Glonass, Galileo and Beidou. (https://geo-matching.com/gnss-receivers); GNSS receivers determine the user position, velocity, and precise time (PVT) by processing the signals broadcasted by satellites. Because the satellites are always in motion, the receiver has to continuously acquire and track the signals from the satellites in view, in order to compute an uninterrupted solution, as desired in most applications. Any navigation solution provided by a GNSS receiver is based on the computation of its distance to a set of satellites, by means of extracting the propagation time of the incoming signals travelling through space at the speed of light, according to the satellite and receiver local clocks. This time difference is transformed into a fake range, the "pseudorange", by multiplying it by the speed of the light in the vacuum, R=c×dt. The pseudorange might be seen as a very rough estimate of the true range between satellite and user, and

has to be corrected to account for a number of phenomena before it can be interpreted as a precise measurement of the true distance.

(https://gssc.esa.int/navipedia/index.php/GNSS_Receivers_General_Introduction) **GNSS prijamnik, GNSS prijamnik:, GNSS prijamnik, GNSS prijemnik::** *GNSS receivers have prior knowledge of each satellite's PRN code (e.g. through the relevant SIS ICD), and correlate the incoming signals with local code replicas, to determine if a given satellite is visible or not.* https://gssc.esa.int/navipedia/index.php/GNSS_Receivers_General_Introduction

heave[6] *(v)* ***(sailing/boating/yachting)*** to stop the boat using the sails or the engine **zaustvaiti jedrilicu / brodicu (jedrima ili motorom)**

heave alonside *(v)* ***(ship handling)*** **povlačiti brod konopima uz lučku obalu / vez:** *200206 During berthing operations the back spring had been put out and was being used to* ***heave the vessel alongside*** *into position.*

heave anchor *(v)* ***(ship handling, seamanship)*** **podignuti sidro:** *Gone out of the relative shelter given by Ile de Groix, the master decided to* ***heave anchor*** *and to reposition. As the crew tried to* ***heave anchor*** *once again they noticed that their anchor appeared to be fouled with the ground tackle of the second tanker. When she attempted to* ***heave the anchor*** *and get under way, the hydraulic windlass motor suffered a catastrophic failure and the cable ran out to the bitter end.* **heave home the anchor podići sidru u sidreno oko:** *We proceded to* ***heave home the anchors*** *and get underway.*

Heave and Away! Ho-ruk! (uzvik pri potezanju konopa)

heave around *(v)* ***(navig)*** to revolve the drum of a capstan, winch or windlass to pull the line, rope or cable *https://officerofthewatch.com/tools/maritime-dictionary/*; haul in a line, usually by means of a capstan or which **okretati bubanj vitla (radi potezanja konopa), potezati uže vitlom**

heave away[1] */'hi:v ə'wei/ (v)* ***(seamanship)*** to haul away; An order to haul away or to heave around a capstan (pull). *https://officerofthewatch.com/tools/maritime-dictionary/* **povlačiti (olabavljeno) uže vitlom, Povlačite (konop vitlom)!** {It.:: alare}

heave away[2] *(v)* ***(seamanship)*** to heave around a capstan; pull **okretati bubanj vitla (radi povlačenja i napinjanja užeta)**

heave down *(v)* ***(sailing/boating/yachting)*** turn a ship on its side (for cleaning); careen **nagnuti (brod, brodicu radi čišćenja dna i bokova)**

Heave ho! ***(seamanship)*** a call for extra collective effort; poticajni uzvik ili naredba **Jače! (vuci, diži itd.)**

heave in[1] *(v)* **= haul in**[1] ***(seamanship, ship handling)*** to haul in a line or cable; take in line or cable **povlačiti (konop / lanac vitlom na brod), uvlačiti (konop, lanac), vući konop (na brod, bez zatezanja), *rikuperat*, Italian:*virare*:** *As the tug began to* ***heave in the tow wire****, the towing winch suffered a burst hydraulic oil line which could not be immediately repaired.* ***Heave in*** *easy! The spring that* ***was being heaved in*** *began paying out rapidly as the drum could not take the weight due to loss of hydraulic power. As the capstan* ***heaved in the wire****, the crew manually flaked about 75 metres of it on the deck to achieve the desired length of tow. The ship's crew changed from manual hauling to using a winch to* ***heave in*** *the tow line.*

heave in[2] *(v)* ***(ship handling, seamanship)*** **podizati lanac sidra, Italian:*virare*:** *As the cable continued to* ***heave in****, the bob weight operated the limit switch, but once again the motor failed to stop and the cable continued to be heaved in. … she let go both anchors but due to her headway, she continued to close with our vessel, while we tested our engine and continued to* ***heave in our anchor cable****. To avoid contact with it, the Mooring Master insisted that instead of using a short kick ahead on the engine, the chafe chain be released by* ***heaving in*** *some slack. Once the engines were running,* ***I began heaving in our port anchor*** *but it was slow going at the start, especially as we were dragging at a fast rate backwards towards the beach. When three cables away, she let go both anchors but due to her headway, she continued to close with our vessel, while we tested our engine and continued to* ***heave in*** *our anchor cable. The Master of the bulk carrier began to* ***heave in their port anchor*** *and to maneuver the vessel to avoid coming into full contact with the drifting vessel.* (https://safety4sea.com/)

Heave in easy! ***(seamanship)*** **Podižite polako! (o sidru)**

heavenly body *(n)* ***(navig)*** **nebesko tijelo**

heave on *(v)* **1** ***(seamanship, ship handling)*** **natezati (uže, konop), zatezati (konop), napinjati (konop, lanac), Italian:*agguantare*:** *To bring the bow alongside, the third mate* ***heaved on*** *the starboard breast line and second mate slackened the stern lines. As the winch operator attempted to* ***heave in on the springs****, the winch repeatedly stalled and rendered. The tanker was warped ahead safely and correctly positioned by* ***heaving o****n the after backspring. The forward mooring party, which initially consisted of an officer and two crewmen, was required to* ***slack down the headlines*** *and* ***heave on the backsprings*** *to assist the vessel's movement along the quay. The C/O was looking at the men on the forecastle and instructing them to* ***heave on the headlines****.* ***The vessel was also unable to heave on her stern lines and bow lines*** *simultaneously to keep the vessel alongside …* **heave on forward spring zategnite pramčani špring, heave on the mooring winches zatezati uže na priveznom vitlu:** *The chief officer also ordered the mooring party to* ***heave on the mooring winches****.* https://safety4sea.com/**; 2** ***(ship handling, seamanship)*** **napinjati sidreni lanac, zatezati sidreni lanac:** *Once fast, the skipper attempted to free the trawl by alternate* ***heaving on the port and starboard warps*** *pulling the vessel towards the fastener against the prevailing tidal stream, at times submerging the gunwale. It is also likely that, due to* ***heaving on the anchor cable****, the ship had minimal headway.* **{It.:: mettere in forza il cavo}**

heave out (=run out) *(v)* ***(seamanship, navig)*** **popuštati (konop), ispuštati**

Heave right in!; Heave right on! *(v)* ***(ship handling, seamanship)*** order given to heave the anchor up into the hawse **Podigni sidro u sidreno oko!**

Heave short! ***(seamanship)*** to heave in until the vessel is riding nearly over her anchor **Lanac okomito!**

heave short *(v)* ***(seamanship)*** to heave in until the vessel is riding nearly over her anchor, i.e. at short stay **povlačiti se po sidru (tako da brod dođe okomito na sidro)**

heave taut *(v)* ***(seamanship)*** to haul in until the line has a strain upon it **napinjati konop jako dok ne bude zategnut, povući jako konop (uže), Italian:*mettere in forza; arridare***

heave the lead */ˌhiːv ðə ˈled/* *(v)* ***(navig, seamanship)*** The operation of taking a sounding with the hand lead (to find bottom). *https://officerofthewatch.com/tools/maritime-dictionary/* **mjeriti dubinu mora olovnicom**

heave the rope on the winch *(v)* ***(seamanship, ship handling)*** **povlačiti konop vitlom, zatezati konop vitlom:** *He was accompanied by the bosun and another able seaman,*

they were both ***heaving the port guy rope*** *on the warping drum of the winch.*

heave tight = heave taut (jako, čvrsto) napinjati (konop) dok ne bude zategnut: *The officer was operating the winch. On* ***heaving the sternline tight****, one of the seamen used a stopper to secure the rope in readiness for it to be turned up on the bitts.*

heave to *(v)* **1** ***(navig, sailing/boating/yachting)*** **(in extremely heavy weather, or while waiting for entering the port) to bring vessel on a course on which she rides easily and hold her there by the use of the ship's engines (holding a position), just just enough to maintain steerageway; stopping or reducing headway of the ship just enough to maintain steerageway zavlačiti brod (u olujnom nevremenu), čekati na moru za ulaz u luku:** *The vessel remained stubbornly beam on to the wind despite all attempts to* ***heave to*** *with the head into the sea and swell. The Master found himself unable to hold the ship's head into the wind and* ***heave-to*** *due to the severity of the weather. As sunset approached he advised the passengers and crew of his intentions to* ***heave-to****; he then turned the ship into the wind and sea and reduced speed, predicting that the depression would pass ahead of his intended track. An alternative option would have been to* ***heave to at sea****. Be extremely conservative when estimating speeds for a passage. It is much better to err on the slow side. You can almost always slow down or even* ***heave-to****, but it is much harder or impossible to make up for lost time.;* **2** ***(sailing/boating/yachting)*** **stop a sailing vessel by lashing the helm in opposition to the sails zaustaviti se jedrima**

heave up[1] *(v)* **1** ***(ship handling, seamanship)*** **podići sidro (u sidreno oko), Italian:*virare l'ancora*, podizati lanac sidra:** *You must* ***heave up anchor****. Pilot sttaion to Master:* ***Heave up*** *and proceed to berth! Having embarked a pilot, a vessel* ***had heaved up her anchor*** *and was under way. The vessel* ***heaved up anchor*** *and started proceeding towards a new position closer inshore in an already crowded anchorage. Have your crew on stand by for* ***heaving up anchor*** *when the pilot embarks. Stand by for* ***heaving up%!****. While* ***heaving up the port anchor*** *in an area with strong current, the anchor appeared to be fouled;* ***We were heaving up the port anchor*** *in a position where the depth of water was 60 metres.* ***The port anchor was quickly heaved up*** *and with a single astern engine movement, we were able to safely clear the wharf and head out to sea.* **heave up anchor! Podigni sidro!;** **2** ***(ship handling, seamanship)*** **podizati (lanac sidra):** ***Heave up port cable****. ...* ***due to heaving on the anchor cable****, the ship had minimal headway.*

heave up[2] *(v)* ***(seamanship, ship handling)*** **podizati (labavo, slobodno uže), podignuti (uže):** *Then third mate proceeded to* ***heave up a head line*** *and the OS was asked to* ***heave up the starboard breast line****. Then third mate proceeded to* ***heave up a head line*** *and the OS was asked to heave up the starboard breast line. Within 10-15 seconds of the OS being asked to* ***heave up the starboard breast line*** *a loud sound of parting rope was heard. The aft mooring team on the cargo vessel took up the slack in the messenger lines and attempted to* ***heave up the tow wire*** *by hand. The second officer looked down at the tow wire and gesticulated to the welder to* ***heave up the messenger line****. Within 10-15 seconds of the OS being asked to* ***heave up the starboard breast line*** *a loud sound of parting rope was heard.*

heave up on the line napinjati uže, zatezati uže: *the mooring party does not seem to have appreciated that it is extremely dangerous to* ***heave up on the spring*** *whilst the vessel is still moving ahead at speed and that merely stopping the engines does not take the way off of the vessel. It is extremely dangerous to* ***heave up on the spring*** *whilst the vessel is still moving ahead at speed and that merely stopping the engines does not take the way off of the vessel.*

heave up[3] *(v)* ***(seamanship, safety)*** **podizati (brodicu za spašavanje, splav itd.), podignuti (brodicu, spalv itd.):** *When I received his signal, I started to* ***heave up the boat*** *from the poop deck winch station while two seamen were guiding the aft part of lifeboat on to the slides.*

heaving[1] *(n)* **1** ***(ship handling, seamanship)*** **bacanje, dobacivanje (konopa na obalu);** **2** ***(ship handling, seamanship)*** **potezanje (olabavljenog užeta, lanca);** **3**

hurricane force *(n)* ***(meteorol)*** **orkan, orkanska jačina vjetra** **hurricane force force storm low ciklonska oluja orkanske jačine, olujna ciklona orkanske jačine:** • *A developing **hurricane force storm low** over the west-central North Atlantic continues to move eastward at 35 knots producing winds of 55-75 knots with significant wave heights up to 12 meters*

(40 feet) within 180 NM south and 120 NM west of the center. Over the next 24 hours max winds will be between 50-75 knots with significant wave heights to 15 meters (50 feet) within 240 NM in the western semi-circle., **hurricane force winds vjetrovi orkanske snake**: *"Low pressure rapidly intensified yesterday and overnight, and continues to produce #**hurricaneforce winds** to 75 kt today," the Ocean Prediction Center said in an update posted to Facebook.*, **hurricane force Wind Warning upozorenje o vjetrovima orkanske snage**: *The latest NWS North Atlantic High Seas Forecast showed a **Hurricane Force Wind Warning** is in effect for the area with seas forecasted to build to 60 feet, or more than 18 meters, over the next 24 hours!* https://gcaptain.com/

hurricane scale (=hurricane categories) The Saffir-Simpson Hurricane Wind Scale is a 1 to 5 rating based only on a hurricane's maximum sustained wind speed **ljestvica orkana**

Hurricane Category 1: minmal damage, **Hurricane Category 2; moderate damage**, **Hurricane Category 3 extensive damage**, **Hurricane Category:4: extreme damage**, **Hurricane Category 5: catastrophic**

Saffir-Simpson Hurricane Wind Scale

Category	Wind Speeds		
	Miles (mph)	Kilometers (km/h)	Knots (kn)
FIVE	≥ 157 mph	≥ 252 km/h	≥ 137 kn
FOUR	130 to 156 mph	209 to 251 km/h	113 to 136 kn
THREE	111 to 129 mph	178 to 208 km/h	96 to 112 kn
TWO	96 to 110 mph	154-177 km/h	83 to 95 kn
ONE	74 to 95 mph	119 to 153 km/h	64 to 72 kn

* This scale only takes wind speed into consideration.
* Only used for hurricanes that form in the Atlantic Ocean & Northern Pacific Ocean.
* In 2012, the NHC expand the windspeed for category 4 by 1 mph in both directions.

husbandry /ˈhʌzbəndri/ *(n)* **1** ***(mar law)*** **COMPARE ship's husband** agent services provided to a ship in the port, for requisite repairs, attending to the management, equipment, and other concerns of the ship; A ship's husband is usually authorized to act as the general agent of the owners, in relation to the ship in her home port.; management of affairs and resources *https://www.collinsdictionary.com/dictionary/english/husbandry*; A term used by steamship lines, agents, or port captains who are appointed to handle all matters in assisting the master of the vessel - while in port - to obtain such services as bunkering, fresh water, food and supplies, payroll for the crew, doctors' appointments and ship repair. induce */inˈdjuːs/* **1** ***(marine eng)*** **inducirati; 2** ***(electr)*** **povlačiti zrak:** *… while the piston begins to descend on the expansion stroke, the piston movement usually helping to **induce air movement** to assist combustion.*

induced air blower *(n)* ***(marine eng)*** **usisni ventilator**

induced draught *(n)* ***(marine eng)*** **umjetni propuh, usisna cirkulacija**

inducement freight rate *(n)* ***(mar law, shipping econ)*** Minimum quantity of cargo or freight required by a shipping line to make it worthwhile to call at a particular port of loading or discharging. **minimalna isplativa vozarina (za ticanje neke luke)**

inductance *(n)* ***(electr)*** **indukcija**

induction */inˈdʌkʃən/ (n)* **1** ***(electr)*** **indukcija:** *Synchronous speed: The speed the machine will attain when it is driven by a three-phase squirrel-cage **induction motor** and there is no slip in the motor and the drive system.***; 2** ***(marine eng)*** **usis, usisavanje, puštanje / uvođenje:** *The time period for the **induction** of starting air To improve the **induction of** fuel/air mixture into the crankcase, one-way valves (check valves, reed valves, or rotary valves) may be used in the intake port to allow th The **induction stroke** commences when the inlet valve opens 10° before tdc when air is drawn into the cylinder as the piston moves down.*

industrial action *(n)* ***(mar law)*** steps such as a strike or work to rule that workers of a firm may take to enforce their demands or to press addressing of their grievances. (http://www.businessdictionary.com/definition/industrial-action.html) **prestanak rada ili štrajk zbor radnih sporova (plaća, uvjeta rada itd.):** *A stevedoring company has locked out up to 140 workers at the ports of ……. after they took **industrial action** at the weekend. rrative The completion date for an extended refit of a Class I passenger vessel, which was new to the company, had been frustratingly **delayed by industrial action**.*

industrial dispute *(n)* ***(mar law)*** a disagreement between workers and management over pay, working conditions, hours of work, etc., especially one that includes strikes (= workers refusing to work): (http://dictionary.cambridge.org/dictionary/english/industrial-dispute) **radni spor (npr. u luci**

itd., između sindikata i poslodavaca), prestanak rada zbog radnih sporova resolve a industrial dispute riješiti radni spor (i početi ponovno raditi)

industry */ˈindəstri/ (n)* **1** ***(shipping econ)*** **grana gospodarstva, grana privrede, *industrija* shipping industry brodarstvo, brodarsko gospodarstvo, brodarska privreda:** *This investigation report is to be circulated among the company vessels and **shipping industry**.*, **transportation industry** ***(US)*** **transport, transportno gospodarstvo:** *The **transportation industry** is the largest industry in the world.*, **fishing industry ribarstvo, ribarsko gospodarstvo:** *Safety at sea for the **fishing industry** has to be a prime concern, Besides involvement in the UK **fishing industry**, I have also experienced the extremes of artisanal fishing in the Pacific Islands and industrial fisheries of Japan.*, **marine industry brodarstvo:** *He is a Master Mariner and has spent over 33 years in the **marine industry**.*, **maritime industry** **1** **brodarstvo:** *He began his career in the **maritime industry** as a Deck Officer with ….. in 1964 and came ashore in 1971 having graduated with a BSc in Nautical Science from Southampton University.*; **2** **pomorsko gospodarstvo, pomorska privreda:** *The human element is, quite rightly, a major topic in the maritime industry. Having been involved in the **maritime industry** for more than 63 years, I've seen a dramatic change in the personnel in charge of ports and harbors throughout the world.*; **2** **industrija (teška, naftna itd.);** **3** **ljudska djelatnost**

ineffective *(adj)* **nedjelotvoran, neučinkovit, neefikasan:** *Additionally, Flag State **inspections** of the vessel **were ineffective**. **Ineffective** use of manpower With an **ineffective pump**, water ingress, and a forecast gale, he chose to divert to the nearest port to effect repairs and take shelter. .. pilotage and the port's vessel traffic service **were ineffective** on this occasion.* **ineffective lookout neefikasno motrenje:** ***Ineffective lookout** and failure to take independent action to avoid collision on the part of the crossing vessel.*

inefficient *(adj)* **1** **nedjelotvoran, neefikasan:** *However, **inefficient scavenging** and other losses, reduce the power advantage to about 1.8. The maintenance was considered necessary because the burner unit was emitting excessive black smoke – a sure sign of **inefficient combustion**.* **render inefficient učiniti neefikasnim;** **2** **bezuspješan**

inert *(v)* ***(cargo handling, safety)*** **inertirati (prazan prostor u tanku):** *… chemical tankers have nitrogen plants capable of supplying large amounts of N2 but I am not sure if this is sufficient or of high enough quality **to inert all tanks** for all cargoes carried that have a low flash point. How to carry out **inerting**, puging, and gas freeing?*

inert gas (=IG) *(n)* ***(cargo handling, safety)*** A gas such as carbon dioxide or nitrogen that is used to make an oxygen deficient atmosphere. Inerted tanks are useful for preserving cargo integrity and reducing the explosive potential of cargo tanks.

https://officerofthewatch.com/tools/maritime-dictionary/; An inert gas is one which has little or no ability to react with other gases, or to heat (e.g. nitrogen and CO2) (www.euronav.com) **inertni plin:** *Carriage is only permitted under an **inert gas blanket**; The ventilation from an **IG (inert gas) blower** was on but the **IG inlet** was opened on all cargo tanks. During the stoppage, tank pressures rose significantly probably as a result of the unsaturated ullage space containing mainly **inert gas**; During this period, due to very high ambient temperature, No 2P COT pressure relief valve opened, **releasing inert gas (IG)/cargo vapour mixture** to the atmosphere, in breach of the applicable Annex 6 of Marpol. Prior to berthing, the **tank inert gas pressures** had been reduced to 70 mm WG; 4. **The inert gas** is used to blanket the oil cargo during discharging operations.*

inert gas inlet *(n)* ***(cargo handling, safety)*** **ulaz inertnog plina close the inert gas**

inlets zatvoriti ulaze inertnog plina

inert gas plant *(n)* ***(marine eng, safety)*** **uređaj inertnog plina:** *The **inert gas (IG) plant** was in operation. so was equipped with a nitrogen gas plant, it was practice to use nitrogen as much as possible for inerting in order to avoid soot generated from the **inert gas plant** entering the tanks.*

inert gas system (=IGS) *(n)* ***(cargo handling, safety)*** **sustav inertnog plina, sustav za inertiranje atmosfere:** *Line clearance was undertaken for a 45-minute period during which **the inert gas system (IGS) was not run**.*

inertia */in'ɜ:ʃiə/* *(n)* **inercija, tromost:** *The first-order **inertia force** from the lower piston is balanced against the corresponding force from the upper pistons, and a well-balanced engine is obtained. In this case he demonstrated inaccuracy in visual range finding abilities and estimation of own ship speed as well as possible unawareness of **ship's inertia characteristics**. The **inertia forces** originating from the unbalanced rotating and reciprocating masses of the engine create unbalanced external moments although the ext The crank also has to **absorb the inertia loading** due to the conrods and pistons, which easily amounts to several tons on each cylinder. A more robust rod pin end enhances the durability required for the increased piston speeds and higher **inertia loads**.*

inertial navigation *(n)* ***(navig)*** a navigation aid that uses a computer, motion sensors (accelerometers) and rotation sensors (gyroscopes) to continuously calculate via dead reckoning the position, orientation, and velocity (direction and speed of movement) of a moving object without the need for external references. It is used on vehicles such as ships, aircraft, submarines, guided missiles, and spacecraft. /(Wikip) **inercijalna navigacija**

inerting *(n)* ***(safety, cargo handling)*** A procedure used to reduce the oxygen content of a vessel's cargo spaces to 8 percent or less by volume by introducing an "inert" gas blanket such as nitrogen or carbon dioxide or a mixture of gases such as flue gas. (www.euronav.com) **inertiranje**

infectious disease */in'fekʃəs di,zi:z/* *(n)* ***(med)*** **= contagious disease infektivna bolest, zarazna bolest**

infestation *(n)* ***(cargo, med)*** **zaraza (kukcima):** *Australia engages Quarantine measures to combat possible Khapra Beetle **infestation**.* https://www.shippingandfreightresource.com/

infested *(adj)* ***(safety)*** **zaražen**

infirmary *(n)* ***(med, nav arch)*** **brodska bolnica**

inflammability *(n)* ***(safety)*** **nezapaljivost**

inflatable boat */in'fleitəbəl/* **(=inflatable)** *(n)* ***(sailing/boating/yachting, safety)*** **gumenjak:** *A **rigid inflatable boat (RIB)** was being employed as a support boat for an event on the water. Fast turns in **rigid inflatable boats** generate large forces which can throw personnel overboard, despite their best attempts to hold on.*

inflation cord *(n)* ***(safety)*** **konopac za napuhavanje (prsluka za spašavanje)**

information *(n)* ***(comm)*** **obavijest obtain information dobiti / ishoditi informacije / podatke, scanty information oskudni podatci:** *A master's reliance on **scanty VHF information** and another's failure to keep a proper lookout contributed to a collision between a containership and an oil tanker off Jebel Ali earlier this year*, **AIS information informacije dobivene sustavom AIS:** ***The lack of AIS information** possibly contributed to the tanker master's ignorance of the container ship's identity immediately before the collision.*, **exchange information razmijeniti informacije:** ***The master and pilot exchanged information on the vessel's status** and briefly discussed the planned departure manoeuvre.*, **wait for further information čekati na daljnje informacije:** *Approximately 30 minutes before*

arrival at the station he was therefore advised to ***stop and wait for further information****.*, **provision of information davanje informacija, pružanje informacija:** ***Provision of information to*** *the surveyor concerning the normal working level of the liquid contained within a tank, and …*, **unambiguous information nedvosmislene informacije:** *When crew critical to an operation are located out of sight of each other, it is vital that* ***unambiguous information*** *is relayed, and that all involved understand their role and responsibilities.* **{Note that the noun** informatio **is regularly used in the singular form in English (uncountable noun). The form *informations* is not acceptable.}**

Information and Traffic Organisation Service *(n)* ***(UK) (navig, ports, safety)*** **Služba za informiranje i organizaciju prometa brodova (UK):** ***Traffic Organisation Services*** *are concerned with, for example: ●● forward planning of vessel movements ●● congestion and dangerous situations●● the movement of special transports ●● traffic clearance systems; ●● VTS sailing plans; ●● routes to be followed; and ●● adherence to governing rules and regulations.* www.gov.uk/maib

information exchange *(n)* **razmjena informacija, razmjena podataka:** ***The Master/Pilot information exchange*** *had been carried out in accordance with the Company Safety Management System and the Master had discussed the prevailing weather conditions had already let go and by the time the pilot arrived on the bridge the master had started the departure manoeuvre without any form of* ***master / pilot information exchange*** *or notification of his intentions. The* ***master and pilot shall exchange information regarding*** *the navigation procedures, local conditions and the ship's characteristics. The ship's stability was determined using the vessel's on board stability computer with* ***the information provided by*** *the staff captain and the chief engineer.*

information service *(n)* ***(navig, safety)*** služba koja priprema izvješća i upute brodovima u plovidbi u području nadležnosti o događajima i okolnostima zbog kojih bi mogli biti ugroženi ljudski životi, sredstva i morski okoliš **služba izvješćivanja:** *Three levels of service can be provided: an* ***information service (INS)****, a navigational assistance service (NAS) and a traffic organisation service (TOS).* ***The VTS Information Service*** *gave regular traffic broadcasts on the port operations VH radio channel.*

infrared *(adj)* **infracrven:** *The coastguard helicopter arrived within 5 minutes and, using the* ***on board infrared (IR) equipment****, was able to identify to the skipper that the seat of the fire was in the starboard after corner of the engine room.*

infrastructure */ˈinfrəˌstrʌktʃə/ (n)* ***(ports)*** **infrastruktura, podgradnja:** *The Port Authority is investing heavily in infrastructure at its container terminals and other facilities and will continue to deliver a high level of service to all carriers. There were no injuries or pollution, but damage was caused to* ***infrastructure on the quayside*** *and the vessel's hull in way of empty ballast tanks. This resulted in the vessel making multiple contacts with the* ***jetty's infrastructure****, resulting in material damage to both the jetty and the vessel before control was regained. The port authority commends government for its* ***investment in infrastructure projects*** *that will address transportation challenges along Canada's trade corridors, improve the movement of goods through the port, and help ease the impacts of growing trade on local communities.* https://www.maritimeprofessional.com/news/federal-funding-port-vancouver-317672 **port infrastructure** sea locks, waterways, breakwaters, quay walls, wharves, docks, piers, jetties, and main roads in a port **lučka infrastruktura:** *To ensure safety of personnel and* ***port infrastructure****, we emailed a request to the overseas shipper asking for a document stating the actual weight of each unit as shipped.*, **shore infrastructure obalna infrastruktura:** *ears in this area, involving loss of control of large vessels during times of strong tidal flow, resulting in* ***contact damage to vessels and shore infrastructure****.*

infringe *(v)* ***(mar law)*** **povrijediti, prekršiti (propise, ugovor)**

infringement *(n)* ***(mar law)*** **kršenje (propisa, ugovora), prekršaj, povreda**

(propisa): *Failure to comply with certification requirement may result in a heavy fine, arrest or a penalty due to the **infringement of flag/port state requirements**.*

in good order and condition *(mar law)* **u dobrom izgledu i stanju, klauzula u dobrom izgledu i stanju**

in good working order *(safety)* **u dobrom stanju za normalan rad:** *Check if the inert gas system (IGS) **is fully operational and in good working order**. rrangements (pilot ladder, accommodation ladder, winches, wires, davits, sheaves and all associated equipment) have been thoroughly inspected and **are in good working order**, and comply with IMO recommendations. In addition to authorised service personnel, crew have equal responsibility **for ensuring that lifeboats are in good working order** and are maintained and operated properly.*

ingress[1] */ˈiŋgres/ (n) (safety)* **prodor ingress of ballast water into holds** *(cargo, mar ins)* **prodor balastne vode u brodska skladišta:** *the Master discovered that **there was water ingress in** No 3(P) ballast deep tank.*, **ingress of water** **prodor vode (u brod):** *Ship's tanks and compartments were sounded and monitored for any **ingress of water** or possibility of pollution, The chief officer left the bridge to see if there was any **water ingress** in the ballast tanks. No **water ingress** or other damage was found. An underwater inspection of vessel revealed **water ingress** in a couple of tanks which will require a complex salvage operation to make safe.* www.gcaptain.com *The forward void spaces were also reported to have **water ingress.** Also, doors, openings, cargo and handling equipment should be secured in order to avoid **water ingress** and to ensure vessel's stability.* https://safety4sea.com/ *The inspection revealed **no water ingress**.* https://safety4sea.com/

ingress[2] *(v) (safety)* **prodrijeti u (o moru, vodi)):** *As a result of the list, sea water ingressed into the vessel* httpss://gcaptain.com

inherent */inˈhiərənt/ (adj)* **sadržan u nečem, inherentan, sam po sebi:** *This points out the **dangers inherent in false information from ARPA** at low ranges and fast moving vessels in these close quarter situations. The **risks inherent in all lifting operations**, including the launching of watercraft, must be rigorously assessed and safe working practices developed.* **inherent vice skrivena mana**

inherent vice *(n) (nav arch)* .. any existing defects, diseases, decay or the inherent nature of the commodity that will cause it to deteriorate with a lapse of time. Examples of goods that are subject to inherent vice are agricultural commodities, such as fruits and vegetables, and tobacco, which have the tendency to over-heat and to be subject to spontaneous combustion.

http://www.tkmglobal.net/chartering_I.HTM; an exclusion found in most cargo insurance policies to account for a defect or inherent characteristic in the nature of the product.

(https://www.flexport.com/glossary/inherent-vice/) **skrivena mana:** *As opposed to an external occurrence, such as a forklift puncturing a packaged item, **inherent vice** cannot be insured against damage or loss since the defect or characteristic is not visible to the carrier or insurer.* https://www.flexport.com/glossary/inherent-vice/

inhibit *(v)* 1 **kočiti, ukočiti;** 2 **spriječiti:** *The flame deck has drilled coolant channels to **inhibit large thermal stresses**. To reduce the corrosive action and **inhibit the formation of scale deposits** in the system it is usual to provide some form of water treatment.*

inhibitor *(n) (marine eng, chem)* **usporivač, inhibitor:** *Any substance which retards or prevents such chemical reactions as corrosion or oxidation. (http://www.marinedieseleurope.com/)*

in-house *(adj) (mar law, shipping econ)* **vlastiti, unutar kompanije:** *The Club's **in-house lawyers** are available to advise on any issue relating to the chartering of vessels, including advising on contract terms, and to assist in resolving We do expect a certain level of certification for some positions and lean mostly on the **in-house**/on-the-job training process. Trainings are conducted by **in-house trainers***

*and also those engaged from reputable consultancies such as… The new vessel joins two other test tanks and increases the **in-house pressure testing** capability and services offered to outside companies needing pressure testing.*

in irons (=in-irons) *(n)* ***(sailing/boating/yachting)*** when the bow of a sailboat is headed into the wind and the boat has stalled and is unable to maneuver; The boat is pointing into the wind with the sails flapping, but it will not pay off on to either tack by its own momentum and is temporarily out of control. *https://www.ypiyachts.com/* **jedrilica okrenuta sasvim u vjetar, bez kretanja**

initial action stage *(n)* ***(safety)*** A period during which preliminary action is taken to alert search and rescue facilities and obtain amplifying information. (IAMSAR/Camsar2014) **preliminarne radnje u traganju i spašavanju**

initial alarm *(n)* ***(safety, marine eng)*** **prvi alarm:** *Main power was restored 15 hours after the **initial alarm**.*

initial course *(n)* ***(navig, safety)*** **početni kurs (U SAR-u):** *After turning my vessel 100 degrees from its **initial course** he was on my port quarter. It was dark, and shortly after **making an initial course alteration** to effect his chosen route, the master fell asleep. Assessing my own and the probable intentions of my two targets, I decided to **stay on my initial course** running over my waypoint.*

initial distress message **prva poruka za pomoć u pogibli, prva poruka za pomoć koju šalje brod u pogibli**

initial operational capability *(n)* ***(navig, electr)*** **početak rada (navigacijskog sustava)**

Initial Position Error *(n)* ***(safety)*** **greška u određivanju početne pozicije (potrage i spašavanja)**

initial position error (X) The estimated probable error of the initial position(s) at the beginning of a drift interval.(IAMSAR/Camsar2014 **pretpostavljena greška u određivanju početne pozicije SAR-operacije**

initial report *(n)* ***(navig, comm)*** izvješće koje plovni objekt predaje službi VTS pri uplovljavanju u područje njezine nadležnosti **početno izvješće:** *Wherever possible after the **initial report**, the master may delegate the task of filing reports to additional parties to a responsible agency or person.*

initials */iˈnɪʃəlz/* *(n)* **početna slova, inicijali**

initial ship design *(n)* ***(nav arch)*** **osnivanje broda**

initial stability *(n)* ***(stabil)*** The stability of a ship in the range from 0° to 7°/10° of inclination **početna stabilnost:** *Although this ballast would have improved **initial stability**, the effect of the decreased freeboard would have also reduced the vessel's righting lever.*

initial transverse metacentre; (M) *(n)* ***(stabil)*** the point of intersection of successive lines of action of buoyancy force (f) when the ship is in the upright condition and subsequently heeled conditions (Rhodes, Ship's Stability, Seamanship, 2003) **početni poprečni metacentar**

initial transverse stability *(n)* ***(stabil)*** **početna poprječna stabilnost**

inject */inˈʤekt/* *(v)* ***(marine eng)*** **ubrizgati:** *The electronically controlled Alpha Lubricator was developed **to inject the oil into** the cylinder directly on the piston ring pack at the exact time that the effect is optimal. Gas injection is stopped immediately on the first **failure to inject the pilot oil** by the patented safety valve incorporated in the control oil pump of the engine.*

injection */inˈʤekʃən/* *(n)* **injection valve** 1 **ventil za ubrizgavanje:** ***The fuel injection***

valve *is located in the centre of the cylinder head.*; **2 fuel injection valve ventil za ubrizgavanje goriva**: ***The fuel injection valve*** *is located in a valve sleeve in the centre of the cylinder head, its opening controlled by the fuel oil pressure and closure effected by the fuel oil pressure.* *(marine eng)* **ubrizgavanje, uštrcavanje injection pump pumpa za ubrizgavanje**: *The fire was caused by fuel oil spraying from the main engine* ***fuel injection pump*** *where a threaded erosion plug had worked loose and blown out.*, **injection pump drive pogon pumpe za ubrizgavanje**: *The new lower valve and injection* ***pump drive*** *design yielded greater simplicity and eliminated the need for adjustments.*, **fuel injection pumpa goriva, fuel injection system sustav za ubrizgavanje goriva**: *The HP part of the* ***fuel injection system****, with the functions of HP generation and accumulation as well as fuel metering, comprises the following:*

injection lag *(n)* *(marine eng)* **kašnjenje ubrizgavanja**

injection period *(n)* *(marine eng)* **trajanje ubrizgavanja (u stupnjevima okretanja koljenčastog vratila), period ubrizgavanja (u stupnjevima okretanja koljenčastog vratila)**: *The time, measured in degrees of crankshaft rotation, between the beginning and end of injection (*

injection pump *(n)* *(marine eng)* A high-variable-pressure pump delivering fuel into the combustion chamber. (http://www.marinedieseleurope.com/) **pumpa ubrizgavanja goriva**: *Valve-controlled* ***fuel injection pumps*** *are located at the height of the cylinder blocks. The cylinder liners are lubricated using* ***separate injection pumps*** *which use a different specification of oil.*

injection system *(n)* *(marine eng)* **uređaj za ubrizgavanje**: *The nozzle is the interface between the* ***injection system*** *and the combustion process: good nozzle performance is essential for good combustion. Two electrically driven pumps installed at the front end of the engine provide hydraulic power for the* ***injection system****.*

injection timing *(n)* *(marine eng)* **reguliranje vremena ubrizgavanja, faza ubrizgavanja, tempiranje ubrizgavanja**: *The cetane number or diesel index will* ***determine injection timing*** *and also influences the combustion noise and production of black smoke.* ***Fuel injection timing*** *can be freely adjusted independently of the injected quantity, Higher NOx emissions were neutralized by slightly* ***delayed injection timing****.*

injection valve *(n)* *(marine eng)* **ventil za ubrizgavanje**: *Each cylinder is individually served by a fuel injection pump, HP pipe and* ***injection valve*** *with uncooled nozzle. The pilot fuel system is a common rail (CR) system with one engine- mounted high-pressure pump supplying the pilot fuel to every* ***injection valve*** *at a constant pressure of 900 bar.*

injector */inˈdʒektə/* *(n)* *(marine eng)* **ubrizgač, raspršivač, rasprskač**: *The in-line six-cylinder model benefited from an upgraded fuel injection pump and a new* ***injector*** *as well as a new charge-air cooling system, which reduces the inlet air temperature by around 10°C ... Further upward movement of the plunger causes the fuel to be raised in pressure and expelled through the delivery valve to the* ***injector****. .* **injector nozzle mlaznica ubrizgača**: *The fuel flows at high velocity through small holes in the* ***injector nozzle*** *causing it to divide up into fine spray which penetrates throughout the combustion chamber.*, **injector needle valve igličasti ventil ubrizgača**: *... the injector has to snap open when the timed HP wave from the pump travelling along the HP pipe has reached the* ***injector needle valve****.*, **injector cam brijeg ubrizgača (na bregastom vratilu / osovini), ekscentar za ubrizgač (na bregastom vratilu / osovini)**: *The camshaft contains the exhaust valve cams as well as the unit* ***injector cams****.*, **worn injector**

Recommendations have been made to the vessel.s managers with the scope of reviewing and updating complance with procedures established in the IMO guidelines, the ISM Code and SOLAS regulations during periodic servicing and maintenance of lifeboats, **launching appliances** and on-load release gear.* **{In preparing for an end launching, usually groundways, made of heavy timbers are laid with an inclination of about 1/2" and 5/8" to the foot parallel to the center line of the ship one on either side of the keel, and spaced about one-third of the beam of the vessel apart. These groundways run the length of the vessel and for some distance out under the water. On top of the groundways are placed the sliding ways, also heavy timbers, and between these two ways is placed a coating of launching grease. The sliding ways are prevented from sliding on the greased groundways by a trigger or similar device and dog or dagger shores. Cradles are built up to fit the form of the vessel, and between the sliding ways and the cradle, wedges are driven and the weight of the ship thus transferred from the building blocks to the sliding ways. After the building blocks and shores are removed, the trigger is released and gravity causes the vessel to slide down the inclined ways. In some cases hydraulic jacks are set at the upper end of the groundways to exert pressure on the sliding ways to assist in overcoming initial friction along the ways. LCF (=Longitudinal Center of Flotation) *(n)* ***(stabil)*** the longitudinal position of the

centre of flotation; LCF is the point at which the ship trims. It is the geometric center of the waterline plane. **udaljenost centra plutanja od sredine broda:** ***LCF*** *can be calculated if the exact shape of the waterplane is known or it may be obtained from the curves of form.*

LCG (=longitudinal center of gravity) *(n)* ***(stabil)*** LCG is the longitudinal distance between center of gravity and frame #0. **udaljenost sistemnog težišta od sredine broda (od glavnog rebra broda):** ***The longitudinal position of the center of gravity*** *is measured in feet from the midships.* **{also abbreviated to: XG}**

LCL */'el si: el/* **(=Less than container load)** *(n)* ***(mar law, shipping econ)*** **COMPARE F.C.L. = less than container load** Less than Container Load – this is when the same container is used for cargoes belonging to multiple shippers and consignees.. The clients deliver their cargo to the lines packing station (CFS – Container Freight Station) and the line then packs the delivered cargo on behalf of the client.. LCL is one of the Container Service Types in shipping.. (https://www.shippingandfreightresource.com/); Less than Container Load refers to the freight forwarders shipping product where cargo from multiple customers is consolidated into one standard marine container. (https://www.transporteca.com/lcl-less-container-load/); Here the carrier takes the goods from two or more shippers, packs them into the container and seals it. *http://www.mindserpent.com/American_History/reference/Tetley_admiralty/Tetley_2004.htm*); Common term for an amount of goods to be shipped and which do not fill an entire container (*http://www.maerskline.com/en-jm/help/shipping-glossary*); Cargo failing to qualify for freight rates given to a standard shipping container due to insufficient quantity or weight. *(http://thelawdictionary.org/less-than-container-load-lcl/)*; Consignment of cargo, which is insufficient to fill a shipping container. It is grouped with other consignment for the same destination in a container at a container freight station. (*http://www.leewardcorp.com/es/*); Consignment of cargo, which is insufficient to fill a shipping container. It is grouped with other consignment for the same destination in a container at a container freight station *http://www.tkmglobal.net/chartering_L.HTM*; LCL (less than container load) is a mode of shipping via ocean. If you don't have enough cargo to fill up an entire container, consider shipping LCL. (https://www.flexport.com/glossary/less-than-container-load/) **zbirni kontejner (kontejner s robom koja glasi na više različitih primatelja):** *Ocean rates for* ***LCL*** *are commonly higher on a per-unit basis than for a full container load. Thus, consolidation of several* ***LCL loads*** *from different places or shippers into a full container can save on costs.* ***Less than Container Load (LCL)*** *is a service offered by freight forwarding companies, allowing shippers to book only part of a container. The smallest standard marine container carries a volume of 33 cubic metres or a weight of 28 tons – so an* ***LCL service*** *should be considered for any shipment considerably smaller than this. With an* ***LCL shipment****, you pay for your load to be shipped in a container with one or more loads from other customers of the freight transport provider. LCL lets you ship in smaller volumes so that you can keep your inventory lean. Instead of purchasing large quantities from suppliers, you can use* ***LCL*** *to keep a steady flow of inventory in smaller quantities. That frees up cash flow for other purchases. When an* ***FCL shipment*** *arrives at port, it's unloaded from the vessel and delivered to the buyer. It's more complicated for* ***LCL****: someone has to consolidate different shipments, process multiple documents per container, and then sort goods for each customer (https://www.flexport.com/learn/ship-by-lcl-or-fcl/) in the case of* ***LCL shipments****, the shipping line operates the container and therefore, is responsible to off load the contents of the container at their CFS..* https://shippingandfreight.academy/ **{the term refers to a partial container load that is usually consolidated with other goods to fill a container}**

LCL consolidated by Consolidator *(n)* ***(logist, shipping econ)*** **zbirni teret za kontejnere koji prikuplja konsolidacijsko skladište:** *In the case of consolidation cargo, the* ***consolidators*** *issue their House Bills of Lading to the shippers and secure a Master Bill of*

Lading from the shipping line for the container which is booked with the line as an FCL and which will show them as a shipper on the lines bill of lading

Gas sealing between **liner** and cylinder head is effected by an iron ring.* **cylinder liner košuljica cilindra, radna košuljica:** *The piston and severely distorted connecting rod were hanging from the **cylinder liner**. The **cylinder liner** features a high collar and drilled cooling channels. The **cylinder liner** is a one-piece casting and incorporates the scavenge and exhaust ports in the lower and upper sections, respectiv*, **dry liner** košuljica smještena u cilindru na suho ***suha* košuljica:** *Close contact between **dry liner** and casting is absolutely necessary ; if it is missing, considerable resistance to heat flow results.*, **wet liner *mokra* košuljica:** *In **wet liners** the water is in direct contact with outer surface of the liner whereas in dry liners the water is in indirect contact with outer surface*, **compression liner odstojni element, podloška, uloška, podložna pločica, liner wear trošenje košuljice:** *The common rail on the engine. der liner,, reduces carbon deposits on the edge of the piston crown and reduces cylinder **liner wear**.*, **liner wall stijenka košuljice cilindra:** *While trying to avoid corrosive wear by optimizing **liner wall temperatures**, it is necessary to keep as much water as possible out of the cylinders.*, **liner surface površina košuljice cilindra:** *A uniform temperature pattern over the entire **liner surface** is reportedly secured through intensive cooling by a special water feed in its upper area.*, **liner bore provrt košuljice:** *The **liner bore** has tiny porous spots which can retain lubricating oil. The upper part of the **liner bore**, where the top piston ring reaches the top of its travel, suffers the greatest wear .*, **liner cooling hlađenje košuljice cilindra:** *Various possibilities for securing load-dependent **cylinder liner cooling** have therefore been investigated.*, **liner running surface radna površina košuljice cilindra:** *The insulating tubes are adapted according to the engine rating to ensure that the temperature of the **liner running surface** is kept above the dew point temperature of water over the full length of the stroke and over a wide load range.*, **liner lubrication podmazivanje košuljice cilindra:** *The five-ring pack includes two compression rings while two spring-loaded scraper rings control lube oil consumption, their position in the upper part of the skirt facilitating easier **piston and liner lubrication**.*, **bore-cooled liner hlađenje kroz radijalne kanale u košuljici:** *Other refinements included a **bore-cooled cylinder liner** and a bevel-cut connecting rod allowing the crankpin diameter to be enlarged.*, **liner large bore liner košuljica širokog provrta, worn liner istrošena košuljica cilindra**

liner[3] *(n)* ***(navy)*** a major warship capable of taking its place in the main (battle) line of fighting ships **glavni brod (ratne formacije)**

liner bill of lading *(n)* ***(mar law)*** a document issued by a carrier (or their agent) to acknowledge receipt of cargo for shipment. Although the term historically related only to carriage by sea, a bill of lading may today be used for any type of carriage of goods (https://en.wikipedia.org/wiki/Bill_of_lading) **linijska teretnica**

liner company *(n)* ***(shipping econ)*** **linijsko trgovačko društvo, linijsko poduzeće:** *... all **liner companies** (which includes all major container and car-carrier companies) have their schedules on the internet.*

liner conference *(n)* ***(shipping econ, mar law)*** **= freight conference = shipping conference** Agreement between two or more shipping companies to provide scheduled cargo and/or passenger service on a particular trade route under uniform rates and common terms. (http://www.businessdictionary.com/definition/liner-conference.html); vozarinski sporazumi brodara na

istim prometnim ili plovidbenim pravcima **linijska konferencija, vozarinska konferencija**

liner operation *(n)* ***(shipping econ)*** **linijska plovidba, linijski srevis:** *Therefore, in **liner operation** the regular scheduled service is the basis of this particular type of ships, …*

liner operator *(n)* ***(shipping econ, mar law)*** liner operator means a vessel-operating common carrier engaged in liner service (https://www.law.cornell.edu/cfr/text/46/appendix-A_to_part_535); "liner operator" means an undertaking whic provides liner shipping services; and is a party to a liner shipping agreement. (https://sso.agc.gov.sg/SL/CA2004-OR1) **linijski brodar:** *When accepting the booking of scrap shipments, **liner operators** must demand that the shipper declares the exact nature and contents of scrap in writing.*

liner port *(n)* ***(shipping econ)*** **linijska luka**

liner service (=service) *(n)* ***(shipping econ)*** Liner service consists of regularly scheduled shipping operations on fixed routes **linijska plovidba, linijska služba, linijski servis:** *General cargo vessels and multi-purpose vessel often **operate on liner services**. The ship sailed later the next morning, and being **on a liner service**, returned to the same port after six weeks. **On a liner service**, the ship operates to a schedule, it trades on a specific route between advertised load and discharge ports on a regular basis. Competition in **liner service** is regulated generally by agreements, known as conferences, among the shipowners. **In liner service** the service must be marketed, the cargoes documented, arrangements made for loading and discharging these cargo all of which fall under the heading* **be engaged on a liner service biti u linijskoj službi (o brodu):** *The vessel was engaged on the Company's **liner service**, linking ports in China with ports in the Middle East.*

liner's haulage *(n)* ***(logist, mar law)*** Liner's haulage is the preliminary and subsequent transport of a container being carried out by the shipping company itself is referred to as liner's haulage. *https://www.logisticsglossary.com/letter/?letter=I* **izravni linijski prijevoz kontejnera (brodar odgovoran za prijevoz tereta od izvoznika do uvoznika)**

liner ship *(n)* ***(shipping econ)*** **= liner[1] = cargo liner linijski brod:** *It would require hundreds of freight aircraft, many miles of rail cars, and fleets of trucks to carry the goods that can fit on one large **liner ship**. About 20 percent of **liner vessels** are ships other than container ships. **Liner ships** also include some car and truck carriers designed specifically to handle passenger vehicles and trucks, …*

liner shipment *(n)* ***(shipping econ)*** **linijska pošiljka:** *Ad valorem freight is freight charged as a percentage of the value of a shipment, usually of high-value goods and Is not normally used in voyage C/Ps, generally being confined to **liner shipments**.*

liner shipping *(n)* **1** ***(shipping econ)*** **linijsko brodarstvo:** ***Liner shipping** plays a very important role in the container shipping industry carrying 25.3 million TEU on around 6313 container ships.*; **2** ***(shipping econ)*** **linijski prijevoz:** ***Liner shipping** is the most efficient mode of transport for goods.* https://www.shippingandfreightresource.com/

liner terms *(n)* ***(mar law)*** Liner terms refer to the ordinary responsibility of the shipowner under a charterparty to control and pay for the loading, stowage, trimming and discharge of the cargo of the charterer. Liner terms are therefore to be contrasted with terms such as F.I.O., F.I.L.O., F.I.O.S. and F.I.O.S.T., which have the effect of transferring some of those responsibilities from the shipowner to the charterer. *http://www.mindserpent.com/American_History/reference/Tetley_admiralty/Tetley_2004.htm*) **linijski uvjeti**

liner trade *(n)* ***(mar law, shipping econ)*** **ANTONYM tramp trade linijska plovidba:** *…. container ships capable of conveying up to 15,000 containers or TEUs (twenty-foot equivalent units)*

*with a speed up to 23 knots have appeared in many **liner cargo trades**. Agreements made for loading and discharging these cargo all of which fall under the heading of **Liner Trades**, which will be carried out either within the liner company or by independent Liner Agents. Container ships are mainly used in the **liner trade**. **In the liner trade** it is usual for the to present his B/L to the Carrier and receive in exchange a Delivery Order..*

liner transportation *(n)* ***(mar law)*** a transportation service that is offered to the public through publication or similar means and includes transportation by ships operating on a regular schedule between specified ports in accordance with publicly available timetables of sailing dates. (Rotterdam Rules 2019) **linijski prijevoz, linijski transport**

line runers *(n)* ***(mar law)*** **brodoprivezivači**

line runner *(n)* ***(ship handling)*** **privezivač, brodoprivezivač, lučki privezivač**

liner waybill (=sea waybill; ocena eaybill; waybill) *(n)* ***(shipping econ, mar law)*** **= seaway bill** Document, issued by a shipping line to a shipper, which serves as a receipt for the goods and evidence of the contract of carriage. In these respects it resembles a Bill of Lading but, unlike a Bill of Lading, it is not a document of title; it bears the name of the consignee who has only to identify himself in order to take delivery of the cargo. (http://www.leewardcorp.com/es/); Document, issued by a shipping line to a shipper, which serves as a receipt for the goods and evidence of the contract of carriage. *http://www.tkmglobal.net/chartering_L.HTM* **linijski teretni list:** *Because it is not negotiable, the liner waybill is not acceptable to the banks as collateral security; the purpose of the **liner waybil**l is to avoid the delays to ships and cargoes that occur when bills of lading are late in arriving at the discharge port. The **liner waybill** is also referred to as a **sea waybil**l or an **ocean waybill** or simply **waybill**.* http://www.leewardcorp.com/es/ **{The Liner Waybill resembles a Bill of Lading but, unlike a Bill of Lading, it is not a document of title; it bears the name of the consignee who has only to identify himself in order to take delivery of the cargo. Because it is not negotiable, the liner waybill is not acceptable to the banks as collateral security; the purpose of the liner waybill is to avoid the delays to ships and cargoes that occur when bills of lading are late in arriving at the discharge port. *http://www.tkmglobal.net/chartering_L.HTM*}**

lines[1] *(n)* ***(nav arch)*** a drawing which shows frame lines in elevation; A pair of half transverse and elevations, with a common vertical center line. loading berth *(n)* ***(ports)*** **ukrcajni vez:** *The ship moved away from the* ***loading berth*** *and started rolling. Two pilots were called to sail the loaded vessel and shift the smaller vessel onto the same* ***loading berth****.*

loading broker *(n)* ***(mar law)*** Company that represents a shipping line at the port of loading. Its duties are to advertise the line's sailings, to obtain cargoes and co-ordinate their delivery to the ship and to sign bills of lading on behalf of the master. (http://www.leewardcorp.com/es/)

agent-posrednik, agent koji posreduje pri ukrcaju tereta

loading calculator *(n)* **1 kalkulator krcanja i slaganja tereta u kontejnere:** *The 3D* ***Load Calculator*** *is a tool where you can insert all the pieces you want to load in a container and see the optimal way to load it in a container*; **2** ***(cargo handling)*** **kalkulator krcanja tereta i stabiliteta broda, lodikator**

loading computer *(n)* ***(cargo handling)*** **računalo za krcanje tereta i stabilitet broda:** *The ship's* ***loading computer*** *was then used to check that the vessel was safe with the pump room flooded. In the* ***loading computer****, there is an ullage entry program where tank ullage tables, petroleum measurement tables are all interlinked with formulae. Ships were, at this stage, still supplied with* ***loading computers*** *that continued to calculate a ship's stability, shear forces, bending and, occasionally, torsion moments. Many of these functions are available only if the tank / draught level gauges and the Ballast Control system is interfaced to the* ***ShipLoad Loading Computer****.* https://www.km.kongsberg.com/ *Damage stability calculation by* ***loading computers****. Do you comply with Resolution MEPC.248(66)?* http://www.sateco.it/loadmaster

loading/discharge rates *(n)* ***(shipping econ)*** **kapacitet ukrcaja i iskrcaja, brzina ukrcaja i iskrcaja:** *The loading programme should cover the order in which tanks are to be loaded/discharged, tank/pump/pipe work allocation and loading/discharge rates in order to minimise the stress on the vessel and the risk of cross-contamination of different grades of cargo.*

loading hose *(n)* ***(cargo handling)*** **COMPARE loading arm savitljiva cijev za krcanje tekućih tereta, *maniga*, fleksibilna cijev za krcanje tekućih tereta:** ***Loading arms and hoses*** *are storage tank equipment commonly used to transfer fuel or liquid.* ***Loading hoses*** *are hardwall, flexible, lightweight hose and can be worn in ATEX areas. 2. 2. Used for suction and escape of oil with aromatic content up to 30%.* https://candnpetroleumequipment.wordpress.com/2015/10/01/loading-arms-versus-hoses/

http://www.techflowmarine.com/products/quay-reel-loading-system/

loading instrument (=loadicator) *(n)* ***(cargo handling, stabil)*** A loading instrument is an instrument, which is either analogue or digital, by means of which it can be easily and quickly ascertained that, at specified read-out points, the still water bending moments, shear forces, and the still water torsional moments and lateral loads, where applicable, in any load or ballast condition will not exceed the specified permissible values. (http://www.iacs.org.uk/document/public/Publications/Resolution_changes/PDF/UR_S1_Rev7_pdf1322.pdf); a shipboard calculation tool which assists the ship's cargo officer in: 1. Planning and controlling cargo and ballasting operations; 2. Rapidly calculating SWSF and SWBM for any load condition.; 3. Identifying the imposed structural limits which are not to be exceeded. (http://marinegyaan.com/what-is-use-of-loadicator-or-loading-instruments-on-ships/); a shipboard instrument to calculate trims, drafts, etc. **uređaj za izračunavanje i izradu plana krcanja, loadicator:** *The **loading instrument** may also be used to perform stability checks if it incorporates stability software. The **loading instrument** is to be checked for accuracy at regular intervals by the ship's Master by applying test loading conditions.*

loading manual *(n)* ***(cargo handling, stabil)*** **upute za krcanje (tereta), priručnik za krcanje (tereta):** *The ship's approved **loading manual** provides a description of the operational loading conditions upon which the design of the hull structure has been based. The approved **Loading Manual** is to be based on the final data of the ship. The **Manual** is to include the design loading and ballast conditions upon which the approval of the hull scantlings is based.*

loading master *(n)* ***(cargo handling)*** the marine transfer operator at the marine terminal who supervises the movement of petroleum products between tanker ships, barges, and the terminal while the vessel is berthed at the dock (https://en.wikipedia.org/wiki/Loading_master) **lučki nadzornik krcanja tereta / broda, lučki voditelj krcanja tereta / broda, nadzornik krcanja tereta / broda:** *Agent and **Loading Master** do not board before sailing, so no signatures are possible on 19 L or Letter of Protest. If inspectors or **loading master** are onboard at the time, get them to seal the samples, with an accurate description of the contents. Normally a **loading master** or the pilot remains on board, once the vessel is moored, to co-ordinate communications between ship and terminal, as well as assessing weathe A short time later, the **loading master** again asked if the vessel was ready to load but still the lines were not cooled to the correct temperature.*

loading operation *(n)* ***(cargo handling)*** Throughout the **loading operation**, the dock water density was consistently measured by the Chief Officer to be about 1.013. **opearcija ukrcaja:** *Narrative A ro-ro vessel's late arrival in port had put her **loading operation** behind schedule: there was no time to lose. Before commencing **loading operations**, I always ensured that both stevedores and my deck crew understood the proper technique, …*

loading order *(n)* ***(mar law, shipping econ)*** pismeni nalog lučkom operateru za obavljanje rada koji izdaje korisnik lučkih usluga **dispozicija (ukrcaja), nalog (ukrcaja)**

loading plan *(n)* ***(cargo handling)*** **plan krcanja:** *There was no dangerous cargo in this area according to the **loading plans**. In accordance with the pre-arrival schedule and **loading plan**, extra ballast was being pumped out. The **loading plan** should always prepared carefully and, especially for containerships, calculations should include the characteristics of each loading and all different sizes of containers.* (https://safety4sea.com/)

loading port *(n)* ***(cargo)*** **luka ukrcaja:** *The vessel was en route to a **loading port**, when the chief engineer commenced routine maintenance of no. 1 auxiliary engine as per maintenance programme. … a coastal LPG tanker was north-east bound in the Dover Strait Traffic Separation Scheme **enroute to its loading port** in Scotland. The terminal managers in the **loading port** did not consider the cargo to be hazardous, and the wet cargo was loaded in rain without trimming or measuring the cargo temperature.*

loading rate[1] *(n)* **ANTONYM unloading rate** ***(shipping econ, ports)*** **brzina ukrcaja (u tonama, koletima, broju kontejnera), kapacitet ukrcaja:** *The hourly **loading rate** was about 10,000 cu m/hr and six cargo tanks were receiving the cargo simultaneously: two tanks per connection. The initial **loading rate** of 120 m3hr-1 was gradually increased to 250 m3hr. The h**ourly loading rate** was about 10,000 cu m/hr and six cargo tanks were receiving the cargo simultaneously: two tanks per connection.*

loading rate[2] **(=loading capacity)** *(n)* ***(marine eng)*** **stupanj opterećivanja (stroja):** *The maximum loading rate "emergency diesel" is close to the maximum capability of the engine in diesel mode. It shall not be used as the normal l**oading rate** in diesel mode* https://www.wartsila.com

loading sequence *(n)* ***(cargo handling)*** **redoslijed krcanja:** *A few amendments were made to the loading and deballasting plan and a revised **loading sequence** was submitted. However, the master stated that he would only agree to continue loading after re-working the **loading sequence** based on the higher rate of loading now demanded.*

loading terminal *(n)* ***(ports)*** **ukrcajni terminal u luci:** *… The SPM tower, located in position Lat. 29_ 06.90' N, Long. 048_ 19.30' E, approx. 1.5 n.m. east of the damaged **loading terminal**. The **loading terminal** numbers the tiers from the bottom of the hold upward including the containers on deck. The cargo stowage plan is prepared by the **loading terminal** after the ship has been loaded and is used to facilitate the subsequent loading and discharge of cargo at all ports along the voyage.*

loading valve **ventil za ukrcaj (tekućih tereta):** *In order to stagger the topping off process of the cargo tanks, the **cargo tank loading valves** had been adjusted to achieve the desired 'spread'.*

load levelling device *(n)* ***(cargo handling)*** **uređaj za izravnavanje tereta**

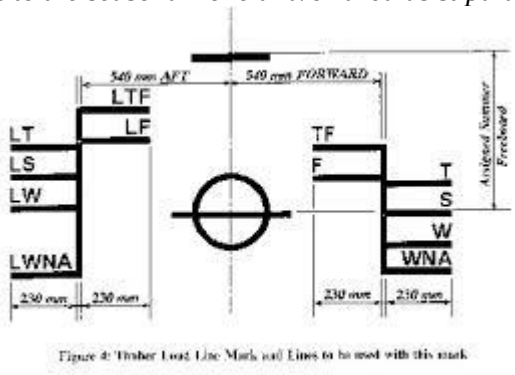
load lifting magnet *(n)* ***(cargo handling)*** **magnet za dizanje (tereta)**

load line *(n)* ***(nav arch)*** The maximum draft to which the vessel may load. The line on a vessel indicating the maximum depth to which that vessel can sink when fully loaded with cargo. (www.euronav.com) **teretna linija, teretna crta:** *A hydrostatic instrument installed in the side of a vessel, below the **light load line**, to indicate the depth to which a vessel is submerged. While discharging at an SBM, a VLCC was required by her owners to have the **Load Lines** changed, in order that the Class Surveyor could check and issue the new certificate on completion of discharge.* **summer load line ljetna teretna linija, winter load line zimska teretna linija, winter North Atlantic load line zimska teretna linija za sjeverni Atlantski ocean, tropical load line tropska teretna linija, fresh water load line teretna linija za slatku vodu, tropical fresh water load line tropska teretna linija za slatku vodu**

load line markings *(n)* ***(nav arch)*** Markings on the ship's side defi ning the minimum freeboard allowable in different ocean areas and different seasons of the year. **oznake teretnih linija**

load lines *(n)* ***(nav arch, mar law)*** Lines painted on the side of a ship, indicating the maximum depth to which the vessel may safely be loaded. See also the International Convention on Load Lines, adopted by IMO on April 5, 1966, which came into force July 21, 1968.*http://www.mindserpent.com/American_History/reference/Tetley_admiralty/Tetley_2004.htm*)

crte teretnih linija, teretne linije: *Each **load line** indicates the minimum freeboard that applies to the seasonal zone and/or area as stipulated in the **International Convention on Load Lines**,*



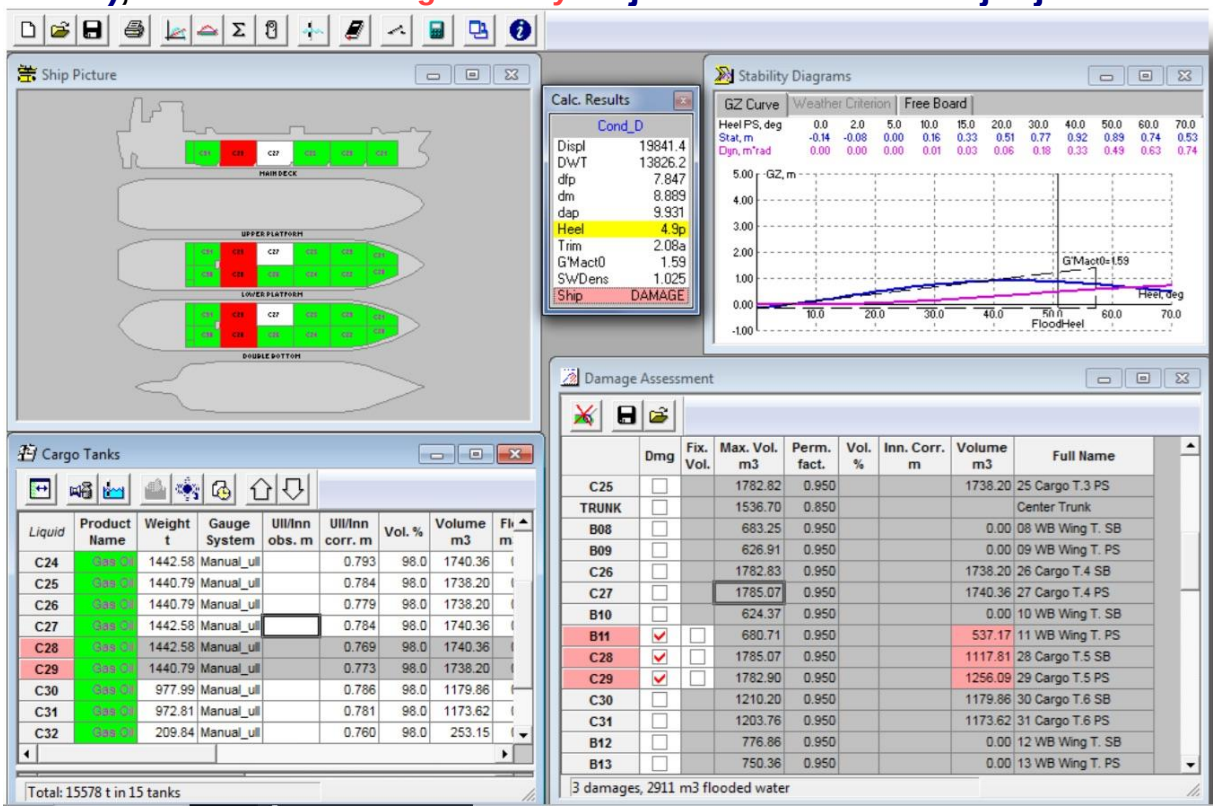
1966 **http://www.irishstatutebook.ie/eli/2001/si/424/made/en/print**

Load Lines Convention *(n)* ***(nav arch, mar law)*** **Konvencija o teretnim linijama:** *Other conventions and amendments were also adopted, such as the **International Convention on Load Lines** (adopted 1966, came into force 1968), a convention on the tonnage measurement of ships (adopted 1969, came into force 1982), ... **The International Convention on Load Lines, 1966** (1966 LL Convention) was adopted by the International Conference on Load Lines on 5 April 1966 and entered into force on 21 July 1968. It has since been amended by means of Assembly resolutions and Protocol of 1988 as amended in 2003 (consolidated edition 2005) **LOADMASTER** - the leading **loading computer** made for onboard operation while checking longitudinal strength, intact stability and damage stability.* http://www.ship-technology.com/contractors/computers/kockum-sonics/kockum-sonics1.html

load management system *(n)* ***(marine eng)*** **sustav upravljanja opterećenjem (glavnoga stroja):** *The **load management system** was programmed to protect the engine by governing the rate at which it responded to telegraph orders.* **override the load management system prebaciti automatski (u nuždi) sa / na sustav upravljanja opterećenja stroja:** *The electronic load management function could be overridden on the bridge. During the pilotage, there were no load restrictions on the main engine and its electronic power management system had been overridden.*

loadmaster (=load master) *(n)* **1** ***(stabil, cargo handling, nav arch)*** A load-calculator designed for a vessel approved by a classification bureau for the calculation of the vessels stability **računalo za krcanje tereta i stabilitet broda, kalkulator krcanja tereta i stabiliteta broda, kalkulator krcanja tereta, *loadmaster*:** ***LOADMASTER*** *- the leading loading computer made for onboard operation while checking longitudinal strength, intact stability and damage stability.* http://www.ship-technology.com/contractors/computers/kockum-sonics/kockum-sonics1.html ***LOADMASTER** calculates damage stability using the Lost Buoyancy Method. By using the **Loadmaster damage generator**, Kockum Sonics can offer support on damage analysis in accordance with MARPOL, IBC or IGC Codes.* http://www.sateco.it/loadmaster *A summary of the calculation results is presented clearly on screen and the program's powerful functionality allows any of the cases to be selected for a detailed study, with the **damage survey report** generated for on- screen presentation as well as hard copy.*

Loadmaster Damage Generator kalkulator svijanja (određenih točaka broda), Loadmaster Damage Survey izvješće o točkama svijanja



http://www.sateco.it/loadmaster; 2 *(cargo handling)* **= loading master** A loadmaster is a position, i.e., the person in charge of loading and unloading the ship. **lučki nadzornik krcanja tereta / broda, lučki voditelj krcanja tereta / broda**

load on ship's construction *(n)* *(nav arch)* **naprezanje brodske konstrukcije**

intact ship's load naprezanje brodske konstrukcije u neoštećenome stanju, damaged ship's load naprezanje brodske konstrukcije u oštećenome stanju

load on top *(v)* *(safety)* the shipboard procedure of collecting and settling water and oil mixtures, resulting from ballasting and tank cleaning operations (usually in a special slop tank or tanks), and subsequently loading cargo on top of and pumping the mixture ashore at the discharge port. (www.euronav.com) **odvojiti ulje od balastne vode:** *When the vessel arrived at the Loading Terminal and attempted to **load on top**, the cargo was not reaching the cargo tanks. The vessel was carrying a cargo of sawn timber and, at the time of the accident, shore stevedores were discharging the timber **loaded on top of** the forward hatch cover.*

load port (=loadport; loading port) *(shipping econ)* **luka ukrcaja:** *As the vessel anchored off the **load port**, awaiting berth, the cleaning of 3 and 4 holds was in progress. The vessel had loaded a cargo of timber and **departed her load port** earlier that evening.*

load reduction smanjenje opterećenja: *The propulsion control must not permit faster **load reduction** than 20 s from 100% to 0% without automatic transfer to diesel first.* https://www.wartsila.com

load slinging equipment *(n)* *(cargo handling)* **hvataljke za teret**

loads on a ship *(n)* ***(nav arch)*** **sile koje djeluju na brod:** *The **loads on a ship structure** include* static loads *(weight of structure, sea pressure, tank pressure, etc.),* dynamic loads *(forces arising from the ship's motions),* sloshing loads *(forces due to the motion of liquids within tanks), and impact loads (e.g. wave* impact loads *and bow slamming).*

load steps *(n)* **stupnjevi opretećenja, razine opterećenja:** *Time between **load steps** of maximum size ≥ 15 s* www.wartsila.com

load-test *(n)* ***(marine eng, nav arch)*** **ispitivanje opterećenja, test opterećenja:** *During the **load-test** of the rescue boat launching appliance, the three point lifting sling failed. To perform the **load test** we use modern water bags placed in the lifeboat, as well as using other specific water bags to carry out the test directly from the davits.*

load water line *(n)* ***(nav arch)*** vodna linija na kojoj brod plovi kad je nakrcan do svog projektnog gaza (https://www.fsb.unizg.hr/geometrija.broda/donji/glosarijteme.htm) **teretna vodna linija, teretna vodena linija, vodena linija pod punim teretom, konstruktivna vodena linija:** *Sounding pipes extending above the **load water-line** are fitted in each compartment and ballast tank.*

Lo and behold! *(interj)* **Gle čuda!**

lobe[1] */ləʊb/* ***(marine eng)*** **režanj, reska:** *Each CR fuel pump is driven by a **two-lobe cam**, whose pumping pro- file can be considerably slower than the conventional jerk pump type that it replaces.*

LOF 2000 (=Lloyd's Open Form) = Lloyd's Standard Form of Salvage Agreement A form of salvage contract approved and published by the Council of Lloyd's to replace, as of September 1, 2000, the previous Lloyd's Standard Form Salvage Agreement (LOF 1995). The acronym LOF derives from the former name of the Agreement (Lloyd's Open Form). LOF 2000 provides for salvage services to be rendered on the principle of no cure - no pay (infra), subject, however, to the provisions of the Salvage Convention 1989 (infra) relating to special compensation (infra) and to the SCOPIC Clause
http://www.mindserpent.com/American_History/reference/Tetley_admiralty/Tetley_2004.htm)

Lloyd'sov standardni obrazac ugovora o spašavanju: *Improving the understanding of* ***LOF*** *is an area on which both the International Salvage Union and Lloyd's intend to campaign.* ***Lloyd's Open Form (LOF)*** *is still the most widely used salvage contract, even after over a century of constant use.*

lofting *(n)* ***(nav arch)*** **SEE shipbuilding process** Making a computerized model of the ship's lines for the purpose of cutting steel sheets and assembly based on the design drawing.; a drafting technique (sometimes using mathematical tables) whereby curved lines are generated, to be used in

plans for streamlined objects such as aircraft and boats (https://en.wikipedia.org/wiki/Lofting); Lofting is the transfer of a Lines Plan to a Full-Sized Plan.; crtanje linija i elemenata broda u prirodnoj veličini; iscrtavanje brodskih linija i elemenata (limova itd.) u mjerilu 1:1 **izrada šablona linija broda, trasiranje:** *Lofting means the work to make the model that we can cut actually and assemble based on the design drawing. We have made a model of the original size before, but in recent years, we make cutting data with a computer.* https://www.fukuzo.co.jp/en/shipbuilding/process *Based on a model made by **lofting**, NC cutting is the work to actually cut out the form of the parts from steel plates.* www.fukuzo.co.jp/en/shipbuilding/process *In days gone by (before computers), **lofting** needed to be done near the boat building effort as the builders needed to frequently check lines and measurements.* https://sandypointboatworks.com/boat-building-articles-journals/boat-building-articles/lofting-basics **computer-aided lofting računalna izrada šablona linija broda**

loftsman *(n)* ***(nav arch)*** A man who lays out the ship's lines in the mold loft and makes the molds or templates therefrom. **brodski traser**

log[1] */lɔg/* *(n)* ***(cargo)*** **trupac, *log*:** *About 250 tonnes of the **logs** were stowed on deck. A gang of stevedores commenced loading the vessel, skillfully standing atop the floating logs and slinging them in ones or twos, depending on the size of the **logs** and capacity of the ship's cargo gear. The holds were duly filled with **logs** and the vessel berthed at a wharf to load the sawn timber and plywood in the tween decks and the containers on the hatch cover. A vessel was in port and the crew was loading **logs** on to the hatch covers.* https://gCaptain.com

log[2] */lɔk/* *(n)* ***(navig, ship's equipment)*** device for measuring the ship's speed and progress **brzinomjer, *log*, Italian:*solcometro*:** *A **log** consisting of a rotator towed through the water by a braided log line attached to a distance-registering device usually secured at the taffrail. The true motion radar requires own ship's speed input, either **log** or manual, in addition to own ship's course input. However, the following observations were made: The radar was stabilised with GPS instead of speed over water from the **log** The propeller wash was not seen but **the log showed** about 0.5 kts stern way.* **speed log brzinomjer, log calibration baždarenje brzinomjera, kalibriranje brzinomjera, common log brzinomjer, patent log patentni log, mehanički brzinomjer na propeler, Walker's Cherub log mehanički brzinomjer, electronic log elektronički brzinomjer, electromagnetic speed log elektromagnetski brzinomjer:** *An **electromagnetic log** consists of suitable registering devices and an electromagnetic sensing element, extended below the hull of a vessel, …*, **hydrodynamic speed log hidrodinamički brzinomjer, ultrasonic speedlog ultrazvučni brzinomjer, log error grješka brzinomjera, log readings očitanje vrijednosti brzinomjera, očitanje brzine:** *…, but an increase in power on engine indicators, an increase in current reading from 2.2kts to 3.2kts, and a **Doppler log reading** of 4.5kts were all immediately observed.*, **Doppler log ultrazvučni brzinomjer:** *It was assumed, wrongly as it turned out, that in shallow water the **Doppler Log** goes automatically into ground tracking mode and gives speed over the ground.*

log[3] */lɔg/* **(=log book)** *(n)* ***(mar law, navig)*** A record book carried aboard a ship in which all significant events relating to the journey are recorded by the ship's officers authorized to make such entries. A ship may have aboard more than one log, including an official log, an engine room log, a radio log, a rough log, etc. The log is at time prima facie evidence in a maritime dispute *http://www.mindserpent.com/American_History/reference/Tetley_admiralty/Tetley_2004.htm*) **dnevnik (brodski, palube itd.):** *It cannot be overemphasized that clear and properly annotated echograms and **navigation logs** are especially important in shoal reports. On very large ships,*

*such as VLCCs, some guidance may be available from reliable **doppler logs**, but on many ships a **doppler log** is not available. Like time-delay measuring logs, **Doppler logs** can only track the seabed in relatively shallow waters. **Modern logs** use electronic sensors or spinning devices that induce small electric fields proportional to a vessel's speed.* **keep a log voditi dnevnik, voditi brodski dnevnik:** *As a part of engine room watchkeeping routine, marine engineers are required to **keep a log** of all important machinery parameters such as pressure,temperatures, revolutions etc.*, **ship's log brodski dnevnik:** *There, he noticed the **ship's log** indicated the vessel had stopped, so he reduced the pitch on the Controllable Pitch Propeller to zero, and called the master.*, **engine room log dnevnik stroja:** ***Engine room log book** is also an important document in case of accident and this gives the clear picture of the engine room working condition and… marine engineers are required to **keep a log** of all important machinery parameters such as pressure,temperatures, revolutions etc. in the **engine room log book**.* **engine movement log dnevnik zapovijedi stroju:** *It is important that the status of the main engine machinery conforms to the status recorded in the **engine movement log** and machinery state boards to enable everyone involved in an operation to maintain a clear understanding.*, **medical log zdravstveni dnevnik, radio log dnevnik radio-službe:** *Regarding the (written) **Radio Log**: under GMDSS regulations, vessels are required to log a summary of Distress (Mayday), Urgency (Pan Pan) and Safety (Securité) traffic . He also has to make entry in the **Radio Log** with timings, so he will use a small source of light and lose his night vision for a few minutes every time he uses a light.*, **scrap log koncept dnevnika, neslužbena / radna verzija dnevnika, *škartafac*, make a log ubilježiti u dnevnik:** *Make a log of all important events*, **deck log dnevnik palube:** *At about the same time, he recorded the visibility in the **deck log**, which he assessed to be about 2 miles in light snow. The **deck log** combined with the bearing log should constitute a complete record of the passage. All events when encountering heavy weather must be carefully and duly entered in the **ship's or deck log book**.*, **periodic log upis manovre (upisnik naredaba stroju), bridge log dnevnik zapovjedničkog mosta:** *Record all events and information in the **bridge log book** correctly.*, **log entry zapis u dnevniku, bilješka u dnevniku:** *In **deck log book** all the entries regarding navigation and charts are mentioned. Whilst not reducing the level of own-vessel business/crew communications, the following should help reduce the number of unnecessary (false) alerts/**log entries** onboard all vessels:* **make a false log unijeti krivu zabilješku / zapis:** *I have personal knowledge of a similar ballasting error where the Master, in an attempt to hide the mistake from authorities, actually **made false log book entries**.*, **log readings zapisi u dnevniku, podatci u dnevniku:** *He should verify the current operational parameters and the condition of all machinery and see if these correspond to the **log readings**.*, **electronic log elektronički dnevnik, dnevnik vođen elektroničkim putem:** *… with the increasing use of computers on ships, the daily log books might be totally replaced with **electronic log books**, but currently paper books are in popular use.*, **official log službeni brodski dnevnik, glavni brodski dnevnk:** *The **official log book** is only for the official entries made by only captain and chief engineer about the crew and their behaviour.*, **position log navigacijski dnevnik, dnevnik pozicija broda:** • *Check the **Position Log** and Chart: Check the type and accuracy of the ship's last fix.*, **fill up the log ispuniti brodski dnevnik, fill in the log ispuniti brodski dnevnik:** *The regulations require that a lookout is kept from sunset to sunrise but this is not done in most cases despite **filling in the log books** to that effect.*, **maintain**

log voditi dnevnik, voditi bilješke (u brodskom dnevniku): ***Maintain log****/record of events and decisions.*

EMERGENCY MUSTER LIST

This muster list must be completed in compliance with SOLAS Chapter III Regulation 37 and the Company Safety Manual.

FIRE OR OTHER INCIDENT
Signal: Continuous sounding of the ship's alarm system.
Action: Emergency parties muster at designated stations with warm protective clothing and lifejackets in hand. All non-tasked personnel collect warm clothing, don lifejackets and muster at: _____

GENERAL EMERGENCY
Signal: Seven or more short blasts followed by a long blast on the ship's whistle, repeated on the ship's alarm system.
Action: All personnel to don lifejackets and warm clothing and muster at designated stations. Reserve Team to prepare lifesaving appliances for launching.

ABANDON SHIP
Signal: _____ The order to abandon ship will be given **ONLY** by the Master or his substitute.
Action: Proceed in an orderly manner to your designated lifeboat or raft wearing lifejackets and warm clothing. The person in charge will take a roll call before launching.

MAN OVERBOARD
Signal: _____
Action: Throw Lifebuoy. Immediately inform the officer of the watch (Tel. _____) state "Man overboard" and give location; Keep the casualty in sight.

CONTROL TEAM — Muster on Bridge

NAME	RANK	DUTIES

FIRST EMERGENCY TEAM — Muster at: _____

NAME	RANK	DUTIES

SECOND EMERGENCY TEAM — Muster at: _____

NAME	RANK	DUTIES

RESERVE TEAM — Muster at: _____
