

# Ship Automation

## For Marine Engineers & ETOs

### 2nd Edition

By  
Alexandr  
Yakimchuk

## Contents

Preface to the Second Edition .....	vii
Electrical Safety .....	ix
<b>1. How to Read Electrical Diagrams .....</b>	<b>1</b>
1.1 Electrical Diagrams .....	3
1.2 Diagram Markings and Designations .....	6
1.3 Electrical Equipment Representation .....	7
1.4 How to Locate an Item in a Diagram .....	7
1.5 Cable and Conductor References .....	8
1.6 Line Break and Line Continuation Reference .....	10
1.7 Method of Wiring .....	10
1.8 Technical Data and Type Designations .....	11
1.9 How to Read a Diagram .....	11
<b>2. Control Elements and Electrical Symbols .....</b>	<b>13</b>
2.1 Electrical Diagram Symbols .....	15
2.2 Abbreviations .....	18
<b>3. Relays and Contactors .....</b>	<b>19</b>
3.1 Terminal Markings and Contact Designations .....	21
3.2 Industrial Electro-mechanical Relays .....	23
3.2.1 Types of Relay Operation .....	23
3.2.2 Miniature and Ice-cube Relays .....	24
3.3 Reed Relays (Electromechanical Printed Circuit Board Relays) .....	27
3.4 Solid State Relays .....	28
3.5 Control Relays .....	29
3.5.1 Coil Voltage Suppressor Modules .....	31
3.5.2 Top-mounted Auxiliary Contact Modules .....	31
3.5.3 Pneumatic Timer Modules .....	31
3.5.4 Ordering Relays .....	32
3.6 Contactors .....	32
3.6.1 Lateral and Top-mounted Auxiliary Contacts .....	35
3.6.2 Mechanical Interlock Module .....	35
3.6.3 Mechanical Latch .....	35
3.7 Contactor Monitoring Device .....	36
3.8 Solid State Contactors .....	37
3.9 Regular Condition Inspection of Relays and Contactors .....	37
<b>4. Overload Relays .....</b>	<b>39</b>
4.1 Bimetallic Overload Relays .....	41
4.2 Trip Class .....	43
4.3 Current Transformers' Operated Overload Relay (Electronic Overload Relays) .....	44
4.4 Problems Encountered with Electronic Overload Relays .....	44
<b>5. Circuit Protection Measures .....</b>	<b>47</b>
5.1 Protection Discrimination .....	49
5.2 Motor Starter Protection .....	49
5.3 Fuses .....	51
5.4 Miniature Circuit Breakers (MCBs) .....	52
5.5 Motor Starter Protectors (MSPs) .....	53
5.6 Moulded Case Circuit Breakers (MCCBs) .....	55
5.6.1 Adjusting Protection Unit .....	55

5.7	Large Molded Case Circuit Breakers .....	57
5.7.1	Motorised Mechanism .....	57
5.7.2	Preconditions for Closing MCCBs .....	58
5.7.3	Overload and Short Circuit Protection Adjustment .....	58
5.8	Insulated Case Circuit Breakers (ICCBs) .....	58
5.8.1	Preconditions for Closing ICCBs .....	59
5.8.2	Tripping Unit and Overcurrent Protection Release System .....	60
5.8.3	Undervoltage Release .....	60
5.8.4	Delay Off Unit for Undervoltage Release .....	61
5.8.5	Shunt Release .....	62
5.8.6	Withdrawable Version ICCBs .....	62
5.8.7	Breaker Data Plate and Control Circuit Diagram .....	63
5.9	Inspection of LV Circuit Breakers .....	64
<b>6.</b>	<b>Rotary Switches, Selector Switches and Changeover Switches .....</b>	<b>65</b>
6.1	Reference System for Selector Switch Contacts .....	67
6.2	Diagram Symbols .....	68
6.3	Controllers .....	69
<b>7.</b>	<b>Time Delay Relays (Timer Relays) .....</b>	<b>71</b>
7.1	Time Delay Adjustment for Multi-range Time Delay Relays .....	74
7.2	Timing Functions Definition .....	75
7.2.1	Delay On .....	76
7.2.2	Delay Off .....	76
7.2.3	On/Off Delay .....	78
7.2.4	Interval .....	78
7.2.5	Recycler .....	78
7.2.6	Star-delta .....	78
7.2.7	Instantaneous Contact Optional Feature .....	79
7.2.8	Multi-function Timer Relay .....	80
7.2.9	Programmable Timer Relays .....	82
7.2.10	Frontal Electronic Time Relays .....	83
7.2.11	Timer Relays – Final Note .....	83
7.2.12	Problems Encountered with Electronic Timer Relays .....	84
<b>8.</b>	<b>Protection and Monitoring Relays .....</b>	<b>85</b>
8.1	Current Monitoring Relay (Over/Under Current Monitoring Relay) .....	87
8.2	Phase Imbalance/Three-phase Voltage Monitoring Relay .....	89
8.3	Insulation Resistance Monitoring Relay .....	90
8.4	Thermistor Protection Units for use with PTC Probes .....	91
8.5	Three-pole Multi-function Protection Relay .....	93
<b>9.</b>	<b>Three-phase Induction Motors .....</b>	<b>95</b>
9.1	Stator Winding .....	99
9.2	Two-speed Pole Changing Motors .....	100
9.3	Motor Nameplate .....	101
9.3.1	Insulation Class .....	102
9.3.2	Degree of Protection for an Enclosure .....	102
9.4	Checking Stator Windings .....	103
9.4.1	Windings Continuity Check .....	103
9.4.2	Windings Insulation Check .....	103
9.4.3	Measuring Three-phase Motor Current .....	105
9.4.4	Verifying the Beginning and End of Motor Stator Winding Sets .....	105
9.5	Problems Encountered with Induction Motors .....	107

<b>10. Motor Starters .....</b>	<b>109</b>
10.1 Direct-on-line (DOL) Starting .....	113
10.1.1 DOL Starter Operation .....	113
10.1.2 Troubleshooting Techniques .....	114
10.1.3 Reversing DOL Starter.....	116
10.1.4 Practise Your Troubleshooting Skills.....	117
10.2 Star-delta Motor Starter.....	118
10.2.1 Star-delta Starter Operation .....	119
10.2.2 Star-delta Starter Applications.....	120
10.3 Dahlander Motor Starter Application.....	122
10.4 Problems Encountered with Motor Starter Enclosures.....	124
10.5 Electromagnetic Spring Set Brake.....	125
10.6 Slip Ring Assemblies.....	126
10.7 Wound Rotor Motor Starter Application .....	127
10.7.1 Problems Encountered with Wound Rotor Motor Starters .....	130
10.8 Variable Frequency Drive .....	130
10.8.1 Basic Principles of Operation.....	130
10.8.2 Braking Resistors.....	133
10.8.3 Interface Menu .....	134
10.8.4 VFD Maintenance .....	135
<b>11. Power Generation and Distribution on Board a Ship .....</b>	<b>137</b>
11.1 Low Voltage Ship Network.....	139
11.2 Low Voltage Power Plant.....	139
11.3 LV Switchboards .....	141
11.3.1 Electric Consumers Network.....	141
11.4 Main Switchboard.....	142
11.5 Emergency Switchboard .....	143
11.6 Main Switchboard to Emergency Switchboard Transfer Line.....	145
11.7 Power Management System.....	146
11.8 Generators' Standby Function .....	148
11.9 Emergency Generator .....	149
11.10 Marine Cables.....	149
11.10.1 IEC Regulations .....	150
11.10.2 Fault-finding on a Cable Passing Through Open Deck Cable Trays .....	152
11.10.3 3M Heat Shrink Cable Repair Technology.....	152
11.11 Enclosure IP Rating.....	154
<b>12. High Voltage Systems .....</b>	<b>157</b>
12.1 Vacuum Circuit Breakers.....	162
12.2 SF6 Circuit Breakers.....	163
12.3 Working on HV Systems .....	164
12.4 Insulation Resistance Tests on High Voltage Equipment .....	164
<b>13. Step-down Transformers .....</b>	<b>167</b>
13.1 3 x 220 V Consumer Network .....	170
13.2 Parallel Operation of Step-down Transformers .....	170
<b>14. Generator Neutral Systems.....</b>	<b>173</b>
14.1 Power System Networks .....	175
14.2 Ship Power Systems .....	176
14.3 LV Earthed Neutral System 3 x 220 V Network .....	176
<b>15. Insulation Resistance Monitoring on AC and DC Networks .....</b>	<b>179</b>
15.1 Insulation Resistance (IR) Basics .....	181
15.2 Onboard Monitoring of IR Faults .....	182
15.3 Insulation Monitoring of 24 VDC Consumer Networks.....	185
15.4 What are the Usual Causes of Earth Faults on Board? .....	186

<b>16. Synchronous Brushless Generators .....</b>	<b>189</b>
16.1 Construction and Main Components .....	191
16.2 Excitation System .....	193
16.3 Automatic Voltage Regulator (AVR) .....	195
16.3.1 Permanent Magnet Generator .....	197
16.4 Parallel Operation .....	197
16.5 Active and Reactive Load Sharing .....	200
16.6 Understanding Power Factor (PF) .....	203
16.7 Insulation Resistance Test .....	205
16.8 Problems Encountered with a Brushless Generator's Excitation System .....	206
<b>17. Programmable Logic Controllers .....</b>	<b>207</b>
17.1 PLC Terminology .....	210
17.2 PLC Inputs .....	211
17.3 PLC Outputs .....	212
17.4 Input/Output Expansion Modules .....	213
17.5 Programming Languages .....	214
17.5.1 Ladder Logic .....	214
17.5.2 Basic Logical Operations .....	215
17.5.3 LAD Programming Example .....	216
17.5.4 Function Blocks .....	217
17.5.5 Logic Gates .....	218
17.6 Textural Programming Language .....	220
17.7 Troubleshooting PLC-based Applications .....	221
<b>18. Process Monitoring Sensors .....</b>	<b>225</b>
18.1 Resistance Temperature Detectors .....	227
18.1.1 Pt 100 Data Table and Characteristics .....	228
18.1.2 Double Pt 100 Probes .....	229
18.1.3 Pt 100 as Temperature Compensation for Thermocouples .....	229
18.1.4 Temperature Measuring Transducers .....	230
18.1.5 Troubleshooting Pt 100s .....	230
18.2 NTC Thermistors .....	231
18.3 Thermocouples .....	232
18.3.1 Thermocouples Types J and K Characteristics .....	233
18.3.2 Exhaust Gas Temperature Monitoring .....	234
18.3.3 Troubleshooting Thermocouples .....	234
18.4 Temperature Monitoring Relay .....	235
18.5 Pressure Transducers .....	235
18.5.1 Troubleshooting 4–20 mA Pressure Transducers .....	237
18.6 Speed Monitoring Sensors .....	237
18.6.1 Electromagnetic Speed Sensors .....	237
18.6.2 Ferromagnetic Speed Sensors with Line Amplifier .....	238
18.6.3 Troubleshooting Speed Pickups .....	238
18.6.4 Speed Monitoring Relays .....	239
18.6.5 Frequency to Current Converters .....	240
18.7 Tachogenerator .....	241
18.8 Proximity Sensors .....	242
18.8.1 Capacitive Sensors .....	242
18.8.2 Inductive Sensors .....	242
18.8.3 Proximity Sensor Output .....	243
18.8.4 Fuel Rack Transmitter .....	243
18.9 Feedback Potentiometers .....	244
18.9.1 Verifying the Integrity of a Potentiometer .....	244
18.10 Incremental Encoders .....	245
18.11 Wiring and Shielding of Analogue Sensors .....	246
18.12 Pressure Switch .....	247

18.13	Temperature Switch .....	247
18.14	Float Switch .....	248
18.15	Fluid Level Monitoring Capacitive Sensor .....	248
18.16	Limit Switch .....	249
18.17	Magnetic Safety Switch .....	250
<b>19.</b>	<b>Intrinsic Safety .....</b>	<b>251</b>
19.1	Zener Barriers .....	255
19.2	IS Applications .....	256
19.3	Approvals and Regulations .....	257
19.4	Periodic Testing of Electrical Equipment in Hazardous Areas .....	257
19.5	Maintenance of Exd-protected Equipment .....	258
<b>20.</b>	<b>Automatic Fire Alarm Systems .....</b>	<b>259</b>
20.1	Wiring Features of Initiating Devices .....	263
20.2	Fire Alarm System Maintenance .....	265
<b>21.</b>	<b>Backup Power Supply .....</b>	<b>267</b>
21.1	Lead-acid Batteries .....	269
21.2	Battery Protection .....	272
21.3	Battery Installation Requirements .....	272
21.4	Charging Lead-acid Batteries .....	273
21.5	Lead-acid Battery Maintenance .....	273
21.6	Safety Precautions when Maintaining Lead-acid Batteries .....	275
21.7	Nickel-cadmium (NiCd) Batteries .....	275
21.8	NiCd Battery Maintenance .....	276
21.9	Automatic Chargers .....	278
<b>22.</b>	<b>Navigation and Signal Lights .....</b>	<b>281</b>
22.1	Problems with Navigation and Signal Lights .....	284
<b>23.</b>	<b>Electrical Safety Practice on Board .....</b>	<b>285</b>
23.1	Electrical Tool Markings .....	288
23.2	Personal Protective Equipment (PPE) .....	288
23.3	Storage Recommendations .....	290
<b>24.</b>	<b>Electrical Tools and Troubleshooting Techniques .....</b>	<b>291</b>
24.1	Digital Multimeter .....	293
24.1.1	Measuring Voltage .....	294
24.1.2	Measuring Resistance .....	295
24.1.3	Continuity Measurement .....	296
24.1.4	Measuring the Integrity of Conductors .....	297
24.1.5	Diode Testing .....	298
24.1.6	Measuring Current .....	300
24.2	Process Calibration Tools .....	301
<b>25.</b>	<b>Spare Parts Management .....</b>	<b>303</b>
25.1	Key Requirements .....	305
25.2	Safety Critical Spare Parts .....	305
25.3	Inspection, Testing and Maintenance .....	305
25.4	Onboard Storage of Spare Parts .....	305

<b>Appendices.....</b>	<b>307</b>
Appendix 1 – How to Read Electrical Diagrams .....	309
Appendix 2 – European Electrical Diagram Symbols.....	310
Appendix 2.1 – Difference between NEMA and IEC Standardised Electrical Symbols.....	315
Appendix 3.1 – Time Relays Definitions.....	319
Appendix 3.2 – Delay On Function Variations.....	320
Appendix 3.3 – Delay Off Function Variations .....	321
Appendix 3.4 – Interval Function Variations.....	322
Appendix 3.5 – Recycler Function Variations .....	323
Appendix 3.6 – Star-delta Function Variations .....	324
Appendix 3.7 – Timer Relay Terminal Definitions and Meanings.....	325
Appendix 4 – Rated Currents of Three-phase Induction Motors (Guidelines for Squirrel-cage Electric Motors) .....	326
Appendix 5 – Rating of Cables.....	327
Appendix 6 – Conversions and Prefixes .....	328
Appendix 7 – Thermocouples -J and -K Reference Table.....	329
Appendix 8 – Marine Classification Societies Electrical Components Approval.....	333
<b>Finally .....</b>	<b>334</b>
<b>Acknowledgements .....</b>	<b>335</b>
<b>References .....</b>	<b>336</b>
<b>Also Available.....</b>	<b>337</b>
<b>Training that Works for Engineers who Work on Board.....</b>	<b>339</b>
