Waypoint List

Updated

25/04/19

See attached ECDIS Printout!

Abbreviations:

Chartpilot xx.5-
Series **NACOS 1100**

No.	No.	Consecutive waypoint number (Remember that the Track-Pilot always "thinks" and executes orders in terms of: "actions TO waypoint!")
Remark	Name	Waypoint names indicating each course change or significant planned events (i.e parameter points)
Type	PP,AP	Arrival waypoint or Parameter point or both (A, P, PA)
Track	Track	Course between each successive pair of waypoints (i.e. leg)
Dist	Distance	Distance between each successive pair of waypoints (i.e. leg)
TrkDst	Dist.Enr.	Cumulative distance of the whole track to a specific waypoint
PlSp	MaxSpeed	Maximum arrival speed planned to the specific waypoint
Rad	Radius	The Radius of the Track where course are to be executed
ROT Pl	ROT	The maximum allowed rate of turn
Crsl		The maximum course difference between the track and the steered course
Ec	Economy	Economy value
TrkL	XTD	The maximum allowed cross-track deviation from the planned track

Waypoint list prepared by VoyagePlanning Officer and approved by the Master

Voyage Briefing conducted as per company regulation.

Contents of briefing, such as Mooring and Berthing plan (if possible), are attached.
