

University of Rijeka, Faculty of Maritime studies

PROJECT ACRONYM AND TITLE: Cybersecurity, resilience, and sustainability in the maritime sector

FUNDING PROGRAMME: Operational Programme Competitiveness and Cohesion 2021-2027

PERSON RESPONSIBLE: Jasmin Ćelić, PhD, Associate Professor

FINANCIAL DATA

Project total cost	Overall funding assigned to PFRI
531,494.89 €	531,494.89 €

SUMMARY

Cybersecurity is an area of interest for various fields of smart specialization and industrial transition, and introducing new programs for adults and students is of great significance for the economy and lifelong learning. Equipping the workshop with hardware and software for simulating cyberattacks and protective measures, alongside preparing the curriculum contents, will significantly expand the service offerings for the maritime sector. This will also create the prerequisites for training other economic segments and supporting their development projects. Implementing the pilot adult education project will test the effectiveness of the introduced methods and help refine the educational curriculum. The target groups are upper-year students, university staff, and experts.

Start date	End date
01.07.2026.	01.07.2029.
